Explanation of the Articles in the Calendar.

Standard times* are given in all columns headed Toronto, Quebec, and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show, when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 14th.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The column, TRANSIT OF FIRST POINT OF ARIES, shows for every day the mean time* at which the FIRST POINT OF ARIES passes the meridian of longitude 4h. 46m. W. (71° 30'), and for any other meridian a correction of 0.655 secs. per degree will have to be applied, minus for longitudes west of the 71° 30', and plus for east.

GREATEST ELONGATION OF THE POLE STAR.—This table gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.)

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 48' 45". The maximum error in the use of this Table will not exceed 5 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

*In the present Almanac the hours are numbered from 0 (midnight) to 23.

†Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

STAR TABLE.

From the times of the transit of the *First Point of Aries* may be derived, with the aid of the following table, the approximate times of culmination, rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the transit of the *First Point of Aries* for the given day in the calendar. If the result exceeds 24 hours, subtract 23h. 56m.

To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from

the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. The stars marked (...) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Example.—Find the time of culmination rising and setting of a *Aquila*.

ECLIPSES IN 1907.

In the year 1907 there will be four eclipses, two of the sun and two of the moon.

I.—A *Total Eclipse of the Sun*, 1907, Jan. 13th, invisible in Canada. The path of totality will traverse Central Asia.

II. A *Partial Eclipse of the Moon*, 1907, Jan. 28–29, partly visible at Toronto, the moon setting eclipsed; the beginning visible generally in North America, the Pacific Ocean, Central and Eastern Asia, and Australia; the end visible in Northwest North America, the Pacific Ocean, Asia, Australia, Central and Eastern Europe.

EASTERN STANDARD TIME.

First contact angle from the north point 137° to E. Magnitude of the eclipse = 0.711 (Moon's dia. = 1'0).

III.—A *Annular Eclipse of the Sun*, 1907, July 10th, invisible in Canada. The path of the Annular Eclipse will cross near the central portion of South America.

IV. A *Partial Eclipse of the Moon*, 1907, July 24th, visible at Toronto; the beginning visible generally in Central and Western Europe, Africa, South America, and North America, except the northwest portion; the end visible generally in Western Africa, South America, and North America except the peninsula of Alaska.

EASTERN STANDARD TIME.

First contact angle from the north point 41° to E. Magnitude of the eclipse = 0.620 (Moon's dia. = 1'0).

A *Transit of Mercury*, 1907.—A Transit of Mercury over the Sun's Disk, November 14th, partly visible at Toronto, the sun rising with Mercury on its Disk. The ingress will be visible generally in Europe, Africa, Western and Central Asia, Western Australia, and South America; the egress in Europe except the north-eastern portion, Africa, Western Asia, South America, and North America except the northwest portion.

The Greenwich mean times of the last two contacts for any point on the surface of the earth may be computed from the following two formulæ, respectively, in which ρ denotes the radius of the earth at that point, ϕ' the geocentric north latitude, and λ the longitude west from Greenwich. The numbers in brackets are the logarithms of the respective coefficients.

Eq. int. = 13h. 47m. 18'38. + [1'7922] ρ sin ϕ' + [1'4077] ρ cos ϕ' cos (72° 18' 30" – λ).

Eq. ext. = 13h. 49m. 57'88. + [1'7838] ρ sin ϕ' + [1'4091] ρ cos ϕ' cos (74° 26' 42" – λ).

In these formulæ the G.M.T. is reckoned from midnight (oh).

At Toronto the interior contact at egress will take place at 8h. 48m. 19s. Standard time 75th meridian. The exterior contact at egress at 8h. 50m. 58s. The least distance of the centres will be at about 7h. 7m., Mercury being to the north of the sun's centre 12' 38".4. The sun rises in Toronto that day at 7h. 10m.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the *tabular refraction*, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become *subtractive*. When great accuracy is required, 0.003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1907

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal and Current Survey, in the Department of Marine and Fisheries of the Dominion of Canada. They are based upon observations obtained by means of self-registering tide gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac office, London.

The Tide Tables for Halifax are based upon the analysis of a tidal record which was obtained during the years 1851, 1852, 1860 and 1861, together with the record from the present tide gauge during five complete years; between October 1895 and August 1901. The Tide Tables for Quebec are based upon tidal record during eight complete years, between November 1893, and March 1902. The Tide Tables for Father Point are based upon tidal record during six complete years; from January 1897 to June, 1903. The Tide Tables for St. John, N.B., are based upon tidal record during eight complete years; between April 1894 and June 1903.

The TIME used is Atlantic Standard, for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide, add 23.4 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Halifax, are given on page 41.

SIXTY YEARS AFTER: 1847-1907.

By GEORGE M. WRONG, M.A.,

Professor of History in the University of Toronto.

THIS is the sixtieth year of the existence of THE CANADIAN ALMANAC, and, in a new country like Canada, a publication is indeed noteworthy that, without interruption, has appeared regularly for so long a time. It is worth while to survey some of the changes which the world has seen since 1847, when THE CANADIAN ALMANAC first appeared. Then Europe and Asia were vastly different from anything we know now. France was still ruled by a king. Italy was, as Prince Metternich said, a mere "geographical expression:" there was no kingdom of Italy, and the peninsula contained some ten separate states, each weak and dependent upon foreign support. Instead of a German Empire there were nearly forty practically independent German states, in which not Prussian but Austrian influence was what chiefly counted. Bismarck had hardly yet been heard of. In Russia were still about 40,000,000 serfs, sold like cattle with the soil, and with no rights that counted as against their masters. In the United States there were millions of black slaves. Chicago, now one of the great cities of the world, was then a second-rate little town with about 20,000 inhabitants. The Far East was a sealed book to the West. In Japan intercourse with the outside world was still forbidden by law, and the penalty of death was imposed upon Japanese visiting a foreign country. So complete was Japan's isolation that, nearly ten years later than this, an American resident in Japan was a whole year without receiving any mail, and telegraph and railway were alike unknown to the Japanese. The Emperor of China still claimed to be the ruler of the whole world, and denounced as arrogant and insolent the proposal of Great Britain to treat with him on equal terms. The Indian Mutiny—that tragic episode in our Empire's life—was still ten years away.

In 1847 there was no Canada in our sense of the word, for the term still meant only the present provinces of Ontario and Quebec. Nova Scotia, New Brunswick, and Prince Edward Island were not only no part of Canada but they had no connection with each other; while the whole North-West was still a quite separate country in the hands of the Hudson's Bay Company, which had a monopoly of its trade. British Columbia was hardly thought of: for years still it was to remain a wilderness inhabited by Indians and a few miners and fur traders.

In 1847 not only Canada, but no single British Colony anywhere, had real self-government. Most of them had legislatures, but with very restricted powers; and the governors from England thought that they had the right and the duty to override local action, if it seemed to them wise to do so. In Canada there was a kind of assumption that in all questions the last word was with the Governor or the Home Government, not with the Canadian people, and there was a constant looking to London to have measures disallowed which were attacked by one or other of the Canadian parties. In 1849 a Canadian mob burned down the Parliament buildings at Montreal because Lord Elgin, the Governor of the day, refused to take steps that would lead to the disallowance in London of a measure—the Rebellion Losses Bill—that had passed the Canadian Parliament by a sweeping majority.

If, politically, in 1847, Canada was backward, it is not easy for the present generation to realize what commercially was her situation. The country was at that time on the verge of bankruptcy. In 1843 Canadian wheat and flour had been given a preference in the British market. But in 1846, when Britain adopted free trade, this preference was repealed. All the available capital in Canada had been invested in building mills, wharves, warehouses, and in opening up lines of communication, for the vast trade in grain which, it was expected, the preference would develop, and its repeal wrought ruin. Not only were private individuals bankrupt; the finances of the government itself were seriously embarrassed. There was not ready money

enough in the country even to pay the government officials, and the Governor-General, the judges and other high personages had to take their salaries in debentures redeemable in cash at some future time. It is an amusing fact that when, in 1849, the St. Andrew's Society of Montreal was angry with Lord Elgin and, to show their anger, resolved to repay to him his subscription of £10, they had no money, and had to order the issue of a debenture for the amount.

Other distresses were troubling Canada in 1847. It was the era of the Great Famine in Ireland, and famine brought with it plague. From the stricken land hundreds of thousands fled to America. They came out in small over-crowded ships. No provision was made for proper care and ship fever wrought among them terrible havoc. In 1847 no less than 100,000 of these poor people landed in Canada. Hundreds died at the quarantine stations, and at Grosse Isle rows of graves of these forgotten dead still remind one of the horrors of those days. A good many persons ministering to the afflicted new-comers caught the plague and died, and the Government, itself almost bankrupt, was put to great expense in caring for the many who landed on Canada's shores.

But though in 1847 an old world, to us very strange, still survived, striking changes were at hand. A new spirit was working and the next year saw revolt and revolution in nearly every important capital in Europe. In France the monarchy was overthrown. In some of the states of Germany and Italy, though less was accomplished than enthusiasts desired, constitutions were established which form still the guarantee of public liberty in those countries. Enthusiasm ran high in 1848 and everywhere among Liberals was the belief that a new era had dawned for mankind. In 1851 was held in the Crystal Palace, near London, the Great Exhibition which was intended to show that the struggles of the nations were henceforth to be in the peaceful competitions of the arts and sciences. The clarion of war, some thought, would be heard no more.

But disillusion came speedily. Europe and America were in fact on the verge of an era of war less prolonged but more terrible, because of the vast numbers engaged, than anything the world had yet seen. The Crimean War, which involved Russia, Britain, France, Turkey, and a part of Italy, broke out in 1854. France, Austria and Italy engaged in a bloody struggle in 1859; Prussia, Austria, and Denmark in 1864; Prussia, Italy and Austria in 1866; and in 1870 the whole of Germany was engaged in a Titanic combat with France. The United States saw a similar convulsion in the great struggle between the North and the South from 1861 to 1865.

It might at first seem that with such carnage the world had gone backward since 1847. Yet out of these conflicts have come some of our greatest movements. The obstacles which check human progress are so strong that only mighty upheavals will loose them. Thus it happened that in Russia what brought the nation face to face with its real condition was the Crimean War, with its terrible record of disaster and inefficiency. Almost all classes demanded reform, and under this pressure Russia made some great strides forward. In 1861, just when civil war on the question of slavery was breaking out in the United States, Russia took the momentous step of freeing her forty million serfs. In other states, too, war led to progress. Italy's wars in 1848, 1849, and 1866 brought national union in the Kingdom of Italy, which we know and take so much as a matter of course that we forget how recent it is. There are men not yet old who were grown up when it came into existence. Likewise Prussia's wars led to German unity, to the German Empire which is so conspicuous in the European world to-day. And we all know that the freedom of the slave, and the firmer welding together of the nation were the enduring results of the tragic struggle in the United States, which lasted longer and cost more lives than any of the European wars. True, therefore, it is that the stupendous struggles into which the nations have plunged since 1847, with their many evil results, have yet helped to promote national unity and public liberty, those two things for which the best minds of the last half of the nineteenth century cared more than they cared for anything else.

But not only on the political side has our world changed. Since 1847, our whole outlook upon life is in many respects different. The world has become smaller. There was then no Suez Canal to make easy the passage from the East to the West. In America **Changes due to Science.** there was no transcontinental railway, and to have crossed the American continent was a considerable distinction. Now the "globe trotter" who has been everywhere is a commonplace. Nature herself is changed to us. It was not until more than ten years after 1847 that Darwin gave to the world his theory of Evolution which has so profoundly modified our whole outlook upon nature and given to her working a charm and interest that have proved almost too absorbing. This new thought, like all change, was to bring conflict and controversy, but what was true in it has survived and has made men to-day freer, nobler, more potent, by giving them a deeper understanding of the world about them.

In 1847 for the first time the telegraph connected Quebec, Montreal and Toronto. Of course there was, as yet, no Atlantic cable, and it usually took at least a fortnight by the fastest ships for news of what happened in England to reach America. The **The beginning of Railways, etc., in Canada after 1847.** railway, still a comparatively new thing even in Europe, was hardly known in Canada and points beyond water communication were remote indeed, for freight and passengers must reach them chiefly by horse carriage. Not until some years after 1847 had Toronto any railway. In 1851 the Northern Railway running northward to Bradford and Barrie was begun, and after that railways came thick and fast. Yet not until 1856 was there a service between Toronto and Montreal, and only in 1860 was the St. Lawrence bridged so that trains from the south could run into Montreal. The two Canadian provinces had at the time about 1,200,000 people, and when we remember how few they were we almost wonder that they had the courage to undertake the vast enterprises of railway and canal building which began during these early years.

In 1847 Canada had not even a post office of her own; until 1851 the postal service was carried on by the Imperial Government. Money was still reckoned in pounds, shillings and pence. The unfortunate person who got into debt might be thrown into prison until he should pay. In the two Canadas there was but one Anglican prelate—the bishop of Quebec. The Presbyterians were divided into three separate churches—the Church of Scotland, the Free Church and the United Presbyterians, and there were Wesleyan Methodists, New Connection Methodists, and so on. In Upper Canada something like a state church still existed, for what is now the state University of Toronto was under Anglican control, and the state endowment of religion known as the "Clergy Reserves," the subject of burning debate, was used chiefly for the benefit of the Church of England. In the Province of Quebec feudalism still survived. The great majority of the farmers were tenants of the land they tilled, not owners, and, if the law was strictly enforced, must grind their grain at the seigneur's mill, and perform for him other services more fitting in mediaeval Europe than in modern America. At that time Canada had no fixed capital, the legislature wandering from place to place, much to the inconvenience of those carrying on the government, who, with the railway still unknown, had to carry the papers necessary for the work of government to places as remote from each other as are Toronto and Quebec.

Though in 1847 Toronto had been for nearly half a century, if not always, the most important place in Upper Canada, it was still in appearance not unlike a flourishing **Toronto in 1847.** frontier town with a population of not more than twenty-five thousand. Excepting Osgoode Hall not one of the fine structures of to-day existed. Where the University buildings stand there was the forest primeval.

Duke and Duchess streets, now well nigh forgotten in their obscurity, were centres of fashion, and the corner of Bay and Front streets, now in the heart of the business district, and near which *THE CANADIAN ALMANAC* is published, was a residential district. When there were disturbances in Toronto in 1849, in connection with the Rebellion Losses Bill, and the Liberal ministers were attacked, the crowd, clamorous before the residence of one of them, the Hon. Robert Baldwin, at the corner of Bay and Front streets, had not far to go to show its disapproval before the residence of another, the Hon. William Hume Blake, a little farther up Bay street.

Since that time, while great indeed have been the changes, the greatest of all is in the significance of the word Canada itself. In 1847 the word meant two half-bankrupt provinces, with so gloomy an outlook on the future that some of the most conspicuous leaders thought of finding political salvation by annexation to the United States. Soou, however, came a great revival. Soon after 1850 the opening up of lines of communication brought movement, trade, ambition, and by 1854 Lord Elgin noted that Canada was already totally different in outlook from the half despairing colony of 1847. This new progress involved a wider political vision and in time the half-dozen British colonies in North America began to think of union in one great state. We all know what happened. In 1867 the Dominion of Canada came into being. It consisted then of only Ontario, Quebec, Nova Scotia and New Brunswick. But the spirit of union was in the air. Other provinces came in speedily and in 1871 "Canada" meant a vast state stretching from ocean to ocean, thinly peopled it is true, but with latent possibilities, the measure of which we are only beginning to understand. It is not without significance that just at the time when we have United Canada appeared also United Germany and United Italy. The United States, too, had just passed through a great civil war to save the Union. It may be that in the annals of mankind the union in Canada will prove to be as important as that in the greater states.

When Sir John Macdonald and his colleagues were planning the Canadian Federation they gave little thought to the great region in the West, then the preserve of the Hudson's Bay Company. Of course they counted upon Canada's getting it some day, but it did not bulk large in their plans, and only the discriminating few dreamed of the real value of the country. Never was a better bargain made than that completed in 1869, by which Canada paid to the Hudson's Bay Company \$1,500,000 and took over the Canadian West, with the additional promise that the Company should have one-twentieth of all the land in the country as it was surveyed—for a trading company a magnificent heritage, making it one of the greatest land-owners in the world. No sooner was this territory acquired than clamour began for a railway to cross it. British Columbia joined Canada on the express understanding that such a line across the continent should soon be built. The difficulties in the way were enormous. The railway would cost more than \$200,000,000—\$50 per head for every man, woman, and child in Canada: an expenditure equal to \$4,000,000,000 for the 80,000,000 people of the United States—a sum that makes huge aggregations like the United States Steel Corporation and the Standard Oil Company take a secondary place. But the thing was done in an incredibly short time, and in 1885 the West and the East of Canada were linked together by steel. After twenty years we see now what all this meant and we must admire the magnificent courage of the men who carried through so stupendous a project. The West has been opened up. Its fertility is beginning to be understood and all Canada is throbbing with hope in regard to its future. Merchants and manufacturers in the East of Canada are finding in the West their needed markets. Toronto and Montreal are growing because the West is growing.

In Canada to-day there is optimism everywhere. Population, for a long time almost stationary, is increasing rapidly and the Canadian people have in themselves a confidence to which they were long strangers. In 1864 the Hon. George Brown visited Ottawa to inspect the parliament buildings then in course of erection. "The buildings are magnificent," he wrote, "the style, the extent, the site, the workmanship are all surpassingly fine. But they are just 500 years in advance of the time. It will cost half the revenue of the province to light them and heat them and keep them clean. Such monstrous folly was never perpetrated in this world before." The great Liberal statesman proved to be a bad prophet. In reality, not twenty years after he wrote, the buildings had proved quite inadequate as a home for Canada's government and new ones are being added all the time. The foreign trade of Canada has grown beyond all dreams of possibility. It will soon be \$500,000,000 a year, and this is, of course, a comparatively small sum compared with the volume of the internal trade.

Nothing is more impressive than to look at a recent map of Canada and to see what rapid changes are coming. North towards Hudson Bay, a land that a few years ago seemed almost as remote as Arabia, settlement is not creeping but running, and towns are springing up which have become considerable places almost before we know of their existence. New Liskeard and Cobalt and Haileybury are names that we see in the newspapers. The average man knows that these places are somewhere in the north but he hardly realizes that they mean a domain of vast wealth that has been discovered within the last few years almost as literally as America itself was discovered long ago.

The New North.

When we turn to the West the changes are bewildering. Winnipeg, with more than a hundred thousand inhabitants, and now the third city in Canada, was little more than a village, without even a railway, less than thirty years ago, and between it and the Pacific Coast stretched a great lone land. It is still, with its vast unpeopled areas, a "lone land" in many ways, but towns and villages are growing up with such magic swiftness that a new map is necessary every two or three years. On the Pacific Coast there was no Vancouver twenty years ago; now it is a city of nearly fifty thousand inhabitants; and soon we shall have farther north a new city, Prince Rupert, which will be to Vancouver what Portland and Seattle are to San Francisco.

The New West.

Optimism is in the air, but alas! optimism has not always been justified. Twenty years ago, or even ten years ago, for instance, it seemed as if mankind might have grown out of the possibility of war between civilized states. But within these ten years we have seen three great wars. Yet still one hopes that war on the North American continent is almost impossible. It is a very striking fact that, in the two greatest divisions of the British Empire, Australia and Canada, the war drums have hardly been heard for a hundred years. Australia, indeed, has never known war; it is a tribute to Britain's might upon the sea that, once the British flag was raised there, no other state has ventured to intrude, though for many years there were thousands of miles of coast unpeopled except by a few natives. The command of the sea, without being exerted openly, still held a whole continent linked to Britain. Canada's record has been only less free from strife. The war of 1812 was our last war, and since that time the whole energies of the Canadian people have been directed to the problems of peaceful development. Two or three times slight rebellions have broken out, but probably not more than two or three hundred people have lost their lives in all of Canada's conflicts since 1812. Is there any state outside of the British Empire that, in the whole course of its history, can show such a record?

Canada's conflicts have been keen enough. Any one who glances over the debates in parliament during almost any period of her history will see how vehement have been the differences. But reason and votes, not violence, have settled the issues. One compensation for Canada's slow growth has been that the people who have come to her, not being rushed in in crowds, have fallen under the influence of the orderly spirit of the country. There is nothing of which Canadians have more right to be proud of than the few crimes of violence in their history. Canada has had, and has, its rushes to mining camps; more and more it is attracting varied elements of population; but every one has been made to understand from the first that there is law in the land, and that at all costs the law will be vindicated. The Canadian Government has let it be known that no outlay will be spared to punish crime. It spent \$130,000 in hunting down the criminals in connection with a recent murder case in the Yukon. In the development of Western Canada the average of crimes of violence has been probably not one-fifth of what it has been for similar conditions in the United States.

The Supremacy of Law in Canada.

The near future has in store wonderful changes for Canada. It is well that we should see the special advantages which her citizens enjoy, but I should not like to close this brief sketch in a spirit of mere jubilation. Much remains to be done to make Canada what it ought to be. A new country has its special dangers. Conditions are hard, and strength and energy are the qualities that tell. Nothing is impossible to the ambitious man. Everything is in a state of flux. There are

The Dangers of Optimism.

few traditions. There is little inherited wealth. There is no inherited rank. In such a situation to many the only goal that seems worth while is the goal of success, and the prevailing gospel is likely to be how to "get there." The changes of the past sixty years have been very remarkable from the point of view of material development. Has Canada grown remarkably in other ways? Do her people think with greater sanity upon the vast issues which they have to decide? Are they better educated? Do they care more for truth, for honour, for uprightness of conduct? Perhaps the answers to some of these questions may give us pause. I am myself disposed to think that they can all be answered in the affirmative, but I am not very sure. In a word, one can be quite certain about our material growth; one is a little doubtful whether our moral stature is increased. Here is the danger to our society. And the remedy? Let each citizen of Canada feel that he is helping to lay the foundations of a great state; let him realize that there are better things than mere "getting on"; let him give his children the very best education in his power and see that, whatever else they learn, they are taught to fear God and to honour Justice and Truth; let him, at whatever cost, take his stand for righteousness and never cast a vote for a man who is bad morally. With such a spirit in Canada we shall be worthy of our noble heritage.

SQUARE, SURFACE, OR LAND MEASURE.

The square foot contains 144 square inches.
Yard = 9 feet = 1,296 inches.
Rod, pole, or perch = 30½ yards = 272½ feet.
Chain = 16 rods = 484 yards = 4,356 feet.

An acre *roughly* stated has four equal sides of 69½ yards; *accurate* measurement gives each side 208.71 feet.
The sides of a square half-acre would be 147.581 feet, and of a square quarter-acre 104.355 feet.

MEASURES OF TIME.

60 seconds = 1 minute.	23, 29, 30, or 31 days = 1 calendar month.

METRICAL WEIGHTS AND MEASURES.

The French metrical system is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin :—

REIGNING KING AND EMPEROR OF INDIA.—Edward VII.

EXECUTIVE POWER.

A sovereign, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—i.e., by the crown, lords and commons. The head of the administration is the premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of nineteen ministers; the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of Great Britain, including the chief officials for Scotland and Ireland, is forty-eight. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.

The parliament of Great Britain is composed of the crown, lords, and commons. The house of lords consists at present of 591—archbishops (2), bishops (24) and peers, the latter divided into dukes, marquesses, earls, viscounts and barons. Three princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 28 representative peers elected for life. The speaker is the lord high chancellor of Great Britain, who is a member of the cabinet, and retires with a change of government. The house of lords has co-ordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be British citizens of the age of 21 years, not bankrupts, nor idiots nor criminals. Members are not paid. The system of

local government has been much simplified of late years. England and Wales are now divided into 62 administrative counties, including the city of London. In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local government, and the duties formerly performed by "vestries" are now discharged by "parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratepayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland in some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

EXECUTIVE POWER.—The king represented by a governor-general, appointed by the crown, and advised by an executive council, consisting at first of seven members. The government holds office as long as it has the confidence of the people, as expressed by their representatives in parliament. The principles of English parliamentary government prevail in the commonwealth and states of the federation. The common and criminal law of England obtains in all the states. The judicature consists of a federal high court, and such other federal courts as the parliament of the commonwealth may establish. The justices of these courts are appointed by the

*Revised and corrected from latest available authorities.

governor-general-in-council, and hold office during good behaviour. The high court is a court of appeal from the courts of the states. Appeals may be made from its decisions to the Privy Council of Great Britain under limitations. The state courts remain under the sole jurisdiction of the state governments, and appeal can be made direct to the king-in-council, as heretofore, under certain restrictions.

GOVERNOR-GENERAL.—Right Hon. Lord Northcote, G.C.M.G.

LEGISLATIVE POWER.—The king, senate and house of representatives. The senators are elected by the people of the states for six years. Each state has an equal representation of six members, and half the number of senators shall retire every three years, but are eligible for re-election. The franchise for the election of a senator is the same as that for the popular body at the time of the union. The president is elected by the senate. The place of a senator becomes vacant if he is absent for two consecutive months of a session. The house of representatives consists, as near as possible, of twice the number of senators, but no state shall have a smaller representation than five members. The first house of representatives consisted of 75 members as follows:—New South Wales, 26, Victoria, 23, Queensland, 9, South Australia, 7, Tasmania, 5, and Western Australia, 5. Members are elected for three years. The speaker is elected by the house. Members of each house receive £400 each as a sessional indemnity. Bills appropriating revenue or moneys, or imposing taxation shall only originate in the house of representatives. As in Canada and England by practice, the senate may not amend bills imposing taxation or appropriating revenue or moneys for ordinary annual services of the government. But the senate may at any stage return to the lower house a bill requesting the amendment of any items or provisions therein, and the house may accept or reject such proposals. In case of a deadlock a dissolution takes place, and afterwards a joint sitting at which a majority of votes decide the fate of the disputed measure. The federal parliament has power to alter the franchise on which its members are elected, but it cannot diminish the voting powers of the people, or withdraw the right of women to vote as long as adult suffrage obtains in any states. The legislative powers of the federal parliament are alone enumerated, and all other powers rest with the state parliaments. In the event of a federal law conflicting with an existing state law, the federal law shall prevail. The federal government has the administration of the departments of customs and excise, which form the chief sources of federal revenue, but of the net revenue from such duties not more than one-fourth shall be applied annually by the commonwealth towards its expenditure, and the balance shall be paid to the several states or applied towards the payment of interest on debts of the several states taken over by the federal government. Uniform duties of customs must be imposed within two years after the establishment of the commonwealth. The king may disallow any federal law within one year from the governor-general's assent.

EXECUTIVE POWER.—The affairs of this protectorate are, under a royal charter, administered by a court of directors in London, with a governor, treasurer-general and residents appointed by them, but in the case of the governor the appointment must be approved by the foreign secretary of state. The Indian penal and other laws are administered with such modifications as are necessary. English magistrates are stationed in the several provinces. Acting Governor, Major Harrington.

The common and criminal law of England prevails in all the provinces except Quebec, where the old French civil code and English criminal law are in force.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The king, senate, and house of commons. The senate is composed of 81 members, when full, appointed by the crown, possessed of property qualification and of the age of 30 years. The speaker is appointed by the crown. It has co-ordinate powers of legislation with the house of commons, except in the case of revenue, taxation, or money bills. Though it cannot initiate or amend such bills, it may reject them. Members are paid \$2,500 for a session of over 30 days, and a sum for travelling expenses at the rate of 10 cents a mile going and returning. The house of commons consists of 214 members, elected from 1885 until 1898 on a dominion franchise, which was, in the latter year, repealed. Dominion elections are run on the provincial voters' lists with some unimportant limitations. Members require no property qualification, but they must be of the age of 21, and British subjects, not disqualified by law. The speaker is chosen by the commons. Parliament has a legal existence of five years unless sooner dissolved by the governor-general, and meets once every year. Members are paid the same as senators. As Canada possesses a system of federal government, her legislative powers are limited to certain subjects of dominion or national import, set forth in the written constitution, or British North America Act, of 1867, with the residue of power not expressly given to the provinces in the federal government. All the provinces of Canada, except Prince Edward Island, possess a very complete system of municipal government, which entrusts certain *quasi* legislative powers to councils in municipal divisions known as cities, counties, townships, towns, villages and parishes, and elected by ratepayers. The rules and usages of procedure of the Canadian parliament and of the legislatures are based on those of the imperial parliament. The closure does not exist in Canada.

The speaker of the legislative council is appointed by the crown. In the seven other provinces there is only one house, an elected assembly, viz. Ontario, 98 members; New Brunswick, 46; P. E. The administration of the Territories is entrusted to a commissioner appointed by the governor-in-council, and the governor-in-council may appoint a council, not exceeding four in number, to aid the commissioner in such administration. Each political party nominates a set of electors on a presidential ticket and the people vote directly for them. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds. If there is no vice-president the secretary of state or other members of cabinet succeed in order of seniority until a new president is appointed or the disability is removed. Senators must be 30 years of age, citizens for nine years, and residents of the states which

elect them. Representatives must be about 25 years of age, citizens for seven years, and residents of the states in which they are elected. The senate has the power of approving or rejecting the higher appointments and treaties made by the president, and of acting as a court of impeachment for the president, judges of the supreme court, and other high functionaries. It can also amend bills for raising revenue, which alone can originate in the house of representatives. The vice-president is *ex-officio* president of the senate, which may also appoint a temporary president. The speaker of the house is elected by its members. Members of both houses receive \$5,000 and travelling expenses every year. The territories are represented by one elected delegate in each case, who cannot vote in the house. The legislative powers of the congress are enumerated in the constitution. The supreme court of the United States can hear and determine issues of laws as to the interpretation of the constitution and may declare the acts of congress unconstitutional or *intra vires*, as the case may be. The federal judges are appointed by the president with the approval of the senate. A permanent civil service is being gradually built up, and removals from office in the case of officials, not political in their nature, are very much less frequent of late years with the extension of civil service rules to all departments.

Executive Power.—In each state there is a governor and a lieutenant-governor and officers to administer the government. The governor and lieutenant-governor are elected by the people for four years in following states: California, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, North Carolina, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wyoming. In the following states the term is three years: New Jersey and New York. In the following, two years: Alabama, Arkansas, Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Vermont, Wisconsin. In the following, the term is one year: Connecticut, Maine, Massachusetts and Rhode Island. All the governors have the power of veto over legislation except in Delaware, North Carolina, Ohio, Rhode Island. It requires a majority or two-thirds vote to over-ride the veto. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

Legislative Power and Local Government.—In all the forty-nine states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia, Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In the following states the term is one for both senate and house, and sessions annual: Connecticut, Maine, Massachusetts, Rhode Island. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Idaho, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to confirmation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are practically effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for municipal and school bodies. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

THE KING'S CIVIL LIST.

Consequent upon the death of Her Majesty Queen Victoria, and the accession of His Majesty Edward VII., there was passed in the Parliamentary session of 1901 what is known as the Civil List Act, the Act by which is determined what charges shall be made on the consolidated fund for the maintenance of the King and his family.

Until George III. came to the throne in 1760, the income of the sovereign was derived chiefly from Crown lands, from a variety of landed property in England and

Wales, Scotland and Ireland, in which the sovereign had a life-interest, and from which he received the rents. In the feudal ages these lands constituted a princely patrimony. In later times this Crown property was greatly reduced by lavish grants to royal favorites. At the Restoration the income from Crown lands was ascertained by a committee of the House of Commons to amount to £217,900 a year, in addition to £4,000 from the Forest of Dean. By the time Charles II. had been on the throne three years he had by his lavish bestowal

of the lands on favorites reduced the income to £100,000. William III., by his grants to favorites who had accompanied him from Holland, made further havoc with the Crown domains; so much so that at the accession of Queen Anne Parliament endeavored to save the remnant by an Act (1 Anne, c. 8) which prohibited alienation of Crown lands, and enacted stringent provisions in regard to the length of the term for which they might be leased and the rents reserved.

Queen Anne, George I. and George II. derived the larger part of their income from their life-interest in the Crown property, but when George III. came to the throne he surrendered his life-interest in the Crown lands. It was turned over to the nation in return for a fixed Civil List of £800,000, subsequently increased to £900,000. George IV., William IV. and Queen Victoria, on their accessions, surrendered their life-interest in the Crown lands in return for a Civil List. The same course was taken by Edward VII. when he came to the throne; and soon after Parliament assembled a committee of the House of Commons was appointed to recommend the new Civil List. It reported on the 4th of April, 1901, and its recommendations were embodied in an Act (1 Edward VII., c. 4), which was read a third time in the House of Commons on June 18th. By this Act the King's Civil List was fixed at a yearly sum of £470,000, assigned as follows:

CLASSES OF EXPENDITURE.	SUM APPROPRIATED.

VI. Unappropriated.....	8,000
Total.....	£470,000

In the event of Her Majesty Queen Alexandra surviving the King it is enacted that there shall be paid to the Queen during her life an annuity of £70,000.

Another clause provides that there shall be paid to the Duke of Cornwall and York "during the joint lives of his present Majesty and of his said Royal Highness, an annuity of £20,000"; that "there shall be paid to the Duchess of Cornwall and York during the continuance of her marriage with the Duke of Cornwall and York, for her sole and separate use, but without any power of anticipation, an annuity of £10,000; and that in the event of the Duchess surviving the Duke there shall be paid to her during her life an annuity of £30,000."

In respect to His Majesty's daughters, Princess Louise (Duchess of Fife), Princess Victoria and Princess Maud

(Princess Charles of Denmark), it is enacted that as a provision for them there shall be an annual allowance of £18,000 during their joint lives, "to be reduced at the death of each of the said princesses by £6,000."

The Civil List of Her late Majesty, Queen Victoria, as fixed by the Act of 1837, was £385,000, assigned as follows:

Her Majesty's Privy Purse.....	£ 60,000
Salaries of Household.....	131,260
Expenses of Household.....	172,500
Royal Bounty, etc.....	13,200
Unappropriated.....	8,040

At the death of the Queen, the allowances to Her Majesty, to the Prince and the Princess of Wales, and in respect to the Prince of Wales's children, aggregated £471,000. The details of these payments were:

Her Majesty's Civil List.....	£385,000
The Prince of Wales (26 Vict., c. 1)....	40,000
The Princess of Wales (26 Vict., c. 1)...	10,000
Annuity, Prince of Wales's children (52-3 Vict., c. 35).....	36,000

Until the death of the Empress Frederick of Germany, on August 5th, 1901, annuities amounting to £72,000 were payable to other members of the Royal Family. These annuities were not affected by the death of the Queen, but with the death of the Empress an annuity of £8,000 came to an end.

The annuities to the Royal Family after the resettlement at the accession of Edward VII. stand thus:

His Majesty (Civil List).....	£470,000
Duke of Cornwall and York....	20,000
Duchess of York.....	10,000
Princesses Louise, Victoria and Maud..	18,000
Princess Christian of Schleswig-Holstein	6,000
Princess Louise, Duchess of Argyll....	6,000
Duke of Connaught.....	25,000
Princess Beatrice (of Battenburg)....	6,000
Duchess of Mecklinburg-Strelitz.....	3,000
Duke of Cambridge.....	12,000
Duchess of Albany.....	6,000

Total.....£582,000

The revenues of the Duchies of Cornwall and Lancaster are outside the Civil List arrangement. Those of Cornwall, valued at £60,000 a year, are vested in the eldest son of the reigning sovereign, who becomes by birth the Duke of Cornwall, by virtue of a patent of Edward III. in 1337. The Duchy of Lancaster was the private patrimony of Henry Bolingbroke, son of John of Gaunt. It is separate from the other possessions of the Crown in order and government, but united to it in point of inheritance. It also brings in a revenue of £60,000 a year.

THE BRITISH ARMY IN 1906-1907.

The year 1906-7 will, in accordance with the Army Reorganization Scheme submitted to the House of Commons on July 12th, 1906, by Mr. Haldane, Secretary of War, see a reduction of 20,000 men—two battalions of guards and eight line battalions—in the British military forces. But for this reduction the military forces during the year would have stood as set out in the accompanying table, which is taken from the Army Estimates for 1906-7, submitted to the House of Commons on March 5th, 1906.

Regular Forces (Regimental) Home and Colonial.....	180,458
Colonial and Native Indian Corps.....	12,491
Army Reserve.....	122,000
Militia (including Permanent Staff).....	132,408
Militia Reserve Division.....	8,000
Militia, Channel Islands (including Permanent Staff).....	3,160
Militia, Malta and Bermuda (including Permanent Staff).....	2,543
Imperial Yeomanry (including Permanent Staff).....	27,638
Volunteers (including Permanent Staff)....	339,675
Total Home and Colonial Establishments.....	828,373
Regular Forces (Regimental) on Indian Establishment.....	75,031
Total.....	903,404

Mr. Haldane in explaining the new scheme reminded the House of Commons of the work for which the British Army is organized. "Primarily," he said, "the task of the British Army is to maintain an Empire which extends over twelve million square miles and embraces a population of 400,000,000 people. It is no use making comparisons between the Army of Great Britain and the armies of France and Germany. Their armies exist for a totally different purpose. If you wish a comparison you must compare the British Army and Navy together, with the armies and navies of other countries and you will have nothing to apprehend from the result of that comparison."

"The best organization for this purpose in the unanimous opinion of the experts, after four months of the closest consideration," he continued, "is an organization of six big divisions in three brigades, on a pattern corresponding with our forces in India. We think it important to make our organization accord as nearly as possible with the organization in India, in case our forces should ever have to act together in some great emergency in defence of the Indian frontier. What we aim at is a force of six big divisions, with a proper equipment of cavalry, which, according to the best calculations, would be four cavalry brigades. We have more cavalry than that. I do not cut off a single cavalry unit. Six big divisions of infantry and four brigades of cavalry and artillery would equal three army corps and represent a total of 150,000 men. These are made up of 50,000 men with the colours, 70,000 in the Reserve, and 30,000 trained on a Militia basis. We have considered in the Defence Committee to what extent the forces abroad can, under existing circumstances, be reduced. There are troubles in Egypt. Things are not

wholly clear or settled in South Africa. There are difficulties in various parts of the Empire. Yet after survey, the Defence Committee is quite clear we can reduce eight battalions abroad and two at home. There are at present fourteen battalions which did not exist ten years ago, and of these we are in the position immediately to get down eight. Whether we can get down more afterwards depends upon circumstances of general policy. In this matter I wish to go cautiously, and the Government do not wish to undertake anything that cannot be performed with absolute safety."

The battalions that are to be disbanded are 3rd Battalion Scots Guards; 3rd Battalion Coldstream Guards; 3rd Battalion Northumberland Fusiliers (Bloemfontein); 3rd Battalion Royal Warwickshire Regiment (Standerton); 3rd Battalion Lancashire Fusiliers (Pretoria); 3rd Battalion Manchester Regiment (Middleburg); 4th Battalion Manchester Regiment (Aldershot); 4th Battalion Royal Warwickshire Regiment (The Curragh); 4th Battalion Northumberland Fusiliers (Limerick); and the 4th Battalion Lancashire Fusiliers (Tipperary).

In alluding to these reductions in the Guards Mr. Haldane reminded the House that the guardsman was an expensive man; and said that looking at these things from the point of view of efficiency and economy, it was not possible for the Government to defend the maintenance of the guards at the strength of battalions at which they had stood since 1897, as the justification for the increase then made seemed to the Government to have disappeared. Mr. Haldane added that the officers and men in the battalions to be disbanded would be absorbed. Nobody would be deprived of his pay while the reduction was going on.

Other features of the reorganization scheme are:— (1) The Militia Artillery is to be converted into an ammunition column, to serve with the existing field batteries (of which 93 are now equipped with guns), and the old fifteen-pounder guns, used by the Militia Artillery, are to be given to the Volunteer Artillery, for training purposes; (2) Greater efficiency is to be demanded from the Volunteers, who, with the other auxiliary forces, are to be encouraged by the County Councils; and (3) Medical and sanitary services are to be placed upon an improved footing. It is the expectation of the War Office and the Government that from these changes there will result greater efficiency in every department, and ultimately a large saving in money.

The average cost per head of the personnel of the Army, Army Reserve, Imperial Yeomanry, and Volunteers, according to the War Office figures submitted to the House of Commons on March 5th, 1906, is:—

Regular Army—	£	s.	d.
6,850 Regimental Officers	484	14	9
179,842 Non-Com. Officers and Men..	81	3	6
Army Reserve	10	5	10
Militia	21	19	3
Militia Reserve	5	2	9
Imperial Yeomanry.....	21	5	2
Volunteers	7	1	11
Colonial Militia (about)	19	0	0

The non-effective charges (half-pay and pensions) swell the figures, especially in the case of officers of the Regular Army. The most expensive corps in the Army are the three regiments of Household Cavalry, which cost for pay alone £60,600 a year. In each regiment there are a lieutenant-colonel, receiving £428 17s. 6d.; three majors at £232 17s. 6d.; six captains at £246 7s. 6d.; and eight lieutenants at £164 5s. The privates receive 1s. 9d. a day, and the total of all ranks is 430. The pay of a regiment of cavalry of the line (566 of all ranks) when serving at home is £18,326; the lieutenant-colonel receiving £392 7s. 6d.; and the privates 1s. 2d. a day. The pay of a battalion of infantry of the line (831) is £20,620 17s. 7d.; the lieutenant-colonel receiving £328 10s.; and the privates 1s. a day. In each case there is some additional pay, these rates being the minimum.

Since the end of the war (1902) there has been a permanent garrison in South Africa. Its strength was settled in 1904. It numbers 21,500 men, and comprises four cavalry regiments, two batteries Royal Horse Artillery, twelve batteries Royal Field Artillery, two companies Garrison Artillery, six companies Royal Engineers, ten line battalions, and four garrison regiments, together with the necessary departmental units. The excess cost of maintaining this force in South Africa instead of at home is about £1,360,000. Towards this cost no contribution is made by the African Colonies; except by Natal, which makes a grant of £4,000 a year. Cape Colony, the Orange River Colony, the Transvaal and Rhodesia contribute nothing towards this Imperial charge.

India bears her own Army charges; and, nowadays, South Africa makes the greatest call on the British Army and the British taxpayers, on whom the maintenance of the Army falls. The amount included in the estimates for 1906-7 was, for military purposes in the Colonies and Egypt, £5,269,309, exclusive of sea transport, cost of arms and stores (most of which are supplied from England), headquarters administrative expenses, and other charges, which are not separately estimated. Towards the £5,269,309 the contributions by the Colonial authorities amount to £593,300, leaving to the British taxpayer over £4,676,000, besides the other unspecified expenses.

The accompanying table gives details of the expenditures in the overseas possessions, and of the contributions by the local governments.

	Military Expenditure.	Contribution by Local Government.
South Africa	£2,246,674	£4,000
Mauritius	225,419	27,300
Hongkong and North China...	563,174	139,900
Straits Settlements	191,256	182,500
Ceylon	91,190	140,600
Malta	746,581	5,000
Egypt	342,779	100,000

Among the military expenditures to which no contribution is made are £126,274 in Bermuda, £130,250 in Jamaica, £166,854 in West Africa, and £427,159 in Gibraltar.

In 1906-7 Halifax and Esquimalt disappeared from the War Office statement of expenditures in British overseas possessions.

The military organization of the Dominion of Canada is dealt with elsewhere in the *Canadian Almanac*. All that needs be noted in this article, which is concerned exclusively with the Imperial forces, is that Canada is now raising a Regular Army of from 4000 to 5000 men to equip the fortresses at Esquimalt, Quebec, and Halifax; and that, in the year 1905-6, British troops were withdrawn from a service in which they had been continuously engaged since Great Britain first obtained a foothold on that part of the North American continent which, since Confederation, has been known as the Dominion of Canada.

The British forces compose what is described as a short service army. This term distinguishes it from the army of thirty years ago. In the army, as it existed prior to 1873, men enlisted for 21 years, and at the end of that time were discharged with a pension. In 1873 this long service system came to an end, and in its place there was established what is now known as the short service plan.

The terms of enlistment have varied in length from time to time since 1873. For some years prior to the South African war, and during the war, most men who went into infantry corps enlisted for three years with the colours and nine years in the reserve. Under the Haldane reorganization scheme, men in Line and Cavalry serve seven years with colours and five with reserve; Field Artillery, six years with the colours and six with the reserve; and Garrison Artillery, eight with the colours and four with the reserve.

About the time the short service system was established, what is known as the territorial system also came into being. Formerly infantry regiments were known by numbers, and generally in addition by titles which belonged characteristically to the regiments, or which commemorated some event or incident of outstanding importance in regimental history. Nowadays, and since the early seventies, infantry regiments are known by the names of counties. When the re-arrangement took place regiments were assigned by name to this or that county, and their depôts were then established in the neighbourhoods from which the regiments then took their names.

There are now 69 of these depôts, and English, Welsh, Scotch and Irish county names are borne by the various regiments. The idea at the bottom of the territorial plan was to give regiments territorial connections, to make them locally popular, and as far as was practicable to mass soldiers hailing from the same part of the country into regiments officially connected with the counties from which the men came. To this end, since the seventies, it has been the practice to recruit regiments from the parts of the country in which their depôts are situated. No matter where the main body of the regiment may be stationed, at Aldershot, at the Curragh, in India, or in Malta, its depôt remains in the neighbourhood to which the regiment is titularly attached. A staff of commissioned and non-commissioned officers of the regiment is stationed at the depôt. There the recruits are received; they are put through a long and hard course of preliminary training, and at the end of this course are drafted from the depôt to the colours.

Since the Army Council was organised in 1904, it has been its policy to strengthen these territorial ties of the

various regiments; and in 1904-5, in many of the *dépôt* towns, monuments were raised to the officers and men of the local regiments who died in the South African War.

Recruiting officers are permanently stationed in most of the large English towns and cities, and frequently these officers go on special duty into the country villages. London is, however, the great recruiting ground of the army.

CHEST MEASUREMENT AND WEIGHT.

The minimum chest measurement is fixed at 33 in., and the minimum weight at 115 lbs.; but the chest measurement and the weight of each recruit depend upon his height and the arm of the service he wishes to join, and are left to the discretion of the approving medical officers.

It is still possible under the short service plan for soldiers to re-enlist and to serve for 21 years. After this length of service has been put in, soldiers become entitled to pensions. For privates and gunners, the pension is from 8d to 1s 6d per day; for non-commissioned officers, 1s 3d to 3s 6d per day; for warrant officers, 2s to 5s per day. Soldiers discharged on ac-

count of wounds or injuries received in action, or for sickness incurred in the performance of their military duty, are entitled to a pension varying with the extent of the disability and with the length of service.

The increase in the rate of soldiers pay, bringing it up to one shilling a day clear of all deductions, dates from April 1st, 1902. The other part of the new scheme of 1902 came into operation on the 1st of April, 1904, and is governed by a Royal Warrant issued on March 27th, 1902, which sets out that—

On and after 1st April, 1904, the following further daily increases of pay shall be granted to all warrant and non-commissioned officers (including paid lance ranks); and to efficient soldiers, who have enlisted for more than three years with the colours, or have been permitted to extend their service, excluding Maltese or non-European soldiers, but including the royal garrison regiments:

SERVICE PAY.	d.
Efficient soldiers, Class I.....	6
Ditto, after 5 years' total service.....	7*
Efficient soldiers, Class II.....	4
Ditto, after 5 years' total service.....	5*

* Increase of 1d. for good conduct.

Class I shall consist of all warrant and non-commissioned officers (including paid lance ranks); and of men who have completed 2 years' colour service, and who have, in the opinion of the officer commanding their unit, attained all necessary proficiency in the duties of their arm, including, in the case of infantry, such a standard in musketry as may be prescribed by regulation.

Class II shall consist of other soldiers who are allowed to extend their colour service, or who, having been enlisted for more than three years, are not placed in Class I; provided in either case that they have completed two years' colour service. Soldiers enlisted for three years with the colours, and, who have not extended their service, shall, if retained with the colours on account of war, be granted service pay during such retention.

Good-conduct pay, at the rates specified below, is granted in addition to ordinary pay, to privates of good character, after the following periods of service:—

After 2 years' service, 1d. a day.	
" 6	" 2d. "
" 12	" 3d. "
" 18	" 4d. "
" 23	" 5d. "
" 28	" 6d. "

A soldier who has been in the army for not more than three months may claim his discharge on payment of £10. After three months the sum is £18, and in this case the permission of the commanding officer is necessary. Discharges by purchase, however, are allowed to the fullest extent consistent with the requirements of the service, and at ordinary times a soldier finds no difficulty in purchasing his discharge.

Until 1871, commissions in the army were bought and sold. Commissioned officers nowadays are drawn from the military academies at Woolwich and Sandhurst; and admission to these schools is obtained only after stiff examinations have been passed. In the army, promotion is by seniority. The pay of a lieutenant is 5s 4d a day; of a captain, 11s 7d a day; of a major, 16s

a day; and of a lieutenant-colonel, 21s a day. There are some other allowances; but the pay and allowances of officers are not sufficient to maintain them in the style which, according to the social traditions of most regiments, officers are expected to keep up. Comparatively few of them are dependent entirely on their army pay.

What are described in England as the auxiliary forces comprise the militia, the volunteers, and the yeomanry cavalry. The militia is the oldest of these services. It is older than the standing army, and until the second or third decade of the nineteenth century all men not suffering from bodily infirmities due to age or other causes, and not specially exempted, were liable to be drawn by ballot for the militia. They could serve either personally or by substitute. Ballots were taken in counties until 1830 to make up the quota of militia each county was compelled by the law of 1760 to equip and maintain.

The militia is a local force, each regiment being raised in the division of the county in which the regiment has its headquarters. It is called out each year for a period of training which cannot exceed 56 days, but which seldom is longer than four weeks. The men enlist for six years, and when under training their pay, their discipline, and the general conditions of their services are very similar to the conditions in the regular army. Until as late as 1871 the militia regiments in each county were nominally under the command of the lord lieutenant of the county; and nowadays, although there are examinations for officers' commissions in the militia, in issuing these commissions the War Department gives preference to local landed gentlemen who are recommended or nominated by the lords lieutenants, the King's representatives in the counties. In connection with the militia there is a

reserve, consisting of men who have accepted extra bounties to hold themselves in readiness to serve abroad if need be in the regular army.

The yeomanry cavalry, which in 1900 was given the name of the Imperial Yeomanry, in its old form was a volunteer force, dating back to the Napoleonic wars. It was composed chiefly of tenant farmers. Many of the great landlords made it a condition in their farm leases that their tenantry should be of the yeomanry. For a long time the yeomanry was but lightly regarded as an auxiliary force. New life, however, was infused into it during the war. Its numbers were greatly increased; and under a royal warrant of the 17th April, 1901, the force was re-organized. It then became permanently the Imperial Yeomanry. The old brigade organization was abolished, and the force is now organized in regiments of four sections, with a regimental staff and a machine gun section. The regiments are under training in camp for sixteen days each year.

Members of volunteer corps are enrolled for three years, and are compelled to put in sufficient time at the drill hall, on the parade ground, and at the rifle ranges, and at the annual encampments, to make themselves efficient, and to pass the annual inspection before an officer from the War Department. Non-efficient volunteers can be sued in the courts for any loss falling upon their regiment in consequence of their failure to earn the Government grant.

Volunteer officers are drawn from the ranks of professional and commercial classes. There is no pay to the holder of a volunteer officer's commission. On the contrary, he incurs considerable expense in connection with his office, a fact which accounts for numerous vacancies in many of the volunteer corps.

THE BRITISH NAVY IN 1906-1907.

GREAT BRITAIN'S NAVAL POLICY.

It has long been the policy of British governments—Liberal as well as Conservative—that the strength of the Navy should be equal to that of the combined fleets of the next two largest naval powers. In recent years ship-building for the British Navy has been somewhat in excess of this requirement; and the feature of 1904 in British naval history—as was recorded in these pages of the *Canadian Almanac* for 1905—was the abandonment of the old two-powers policy.

There was no formal declaration of the abandonment of the old policy and the adoption of a more progressive one; but something equivalent to a declaration of this kind was made by Earl Selborne, First Lord of the Admiralty, in the House of Lords, on August 9th, 1904, in answer to a speech made by Lord Brassey, who had urged that as the two-power standard had been reached there should be some retrenchment as regards new construction.

Earl Selborne reminded the House that the offer made by Lord Goschen, when First Lord of the Admiralty, to bring about a gradual reduction by agreement with foreign nations had never been withdrawn; and, referring to the two-power standard, pointed out that in regard to cruisers and torpedo boats the standard had never had a numerical application. No other Admiralty in the world had to consider that the safe-guarding of its shores was the first duty of the navy, and that on it depended the safety of the food of the people, or had to safeguard a vast and prepondering ocean commerce. Hence they could not compare the naval expenditure of this country with the naval expenditure of any two or more powers. The recent great expenditure on naval works was due to the fact that the question had been neglected for nearly two generations; and it had been necessary during the past ten years that Great Britain should overtake arrears.

This aspect of the British Navy was briefly discussed in the House of Commons at a much more recent date than Lord Selborne's speech on August 9th, 1904. On August 1st, 1906, Lieutenant Bellairs, R.N., Liberal Member for Lynn Regis, asked the Prime Minister whether the two-power standard was the one on which the new naval programme for the ensuing two years was framed; and whether it meant, as had hitherto been the case, a margin of safety over the two strongest European powers in the number of efficient battleships and a large superiority in cruisers. "The new ship-building programme," said Sir Henry Campbell Bannerman, "was framed after careful consideration of the programmes of the various foreign Powers, and the recent changes made in them. No new standard has been adopted, and it is considered equal to the requirements of the nation."

NEW SHIPS THAT HAVE COME INTO SERVICE AND SHIPS IN BUILDING IN 1906-7.

Between the 1st April, 1905, and 31st March, 1906, the following ships were completed and became available for service:—3 battleships, *Dominion*, *Hindustan*, *New Zealand*; 8 armoured cruisers, *Antrim*, *Argyll*, *Carfaxton*, *Devonshire*, *Hampshire*, *Roxburgh*, *Black Prince*, *Duke of Edinburgh*; 1 second-class cruiser, *Encounter*; 8 scouts, *Adventure*, *Attentive*, *Forward*, *Foresight*, *Pathfinder*, *Patrol*, *Sentinel*, *Skirmisher*; 16 destroyers; 13 submarines; 1 floating coal dépôt.

On 1st April, 1906, there were under construction:—6 battleships; 10 armoured cruisers; 12 destroyers (coastal); 5 destroyers (ocean-going); 1 destroyer (very fast ocean-going); 1 royal yacht; 15 submarines and a repair ship.

THE COST OF THE NAVY.

The gross expenditures on the Navy for 1906-7, according to the first estimates submitted to the House of Commons on the 19th of February, 1906, were £33,573,302, a decrease of £1,520,000, as compared with the expenditure in 1905-6. The number of seamen proposed and the estimated expenditures were as follows:—

I.—Numbers.

A—Total number of Officers, Seamen, Boys, Coast Guard, and Royal Marines	129,000
---	---------

II.—Effective Services.

1—Wages, etc. of Officers, Seamen, Boys, Coast Guard, and Royal Marines	£8,946,527
2—Victualling and Clothing for the Navy	2,582,099

THE PROGRAMMES OF THE OLD AND THE NEW GOVERNMENT.

These estimates, however, which were those of the Balfour Government, were not adhered to in their entirety. Why they were altered and what changes were made were explained by Mr. Edmund Robertson, Secretary to the Admiralty, when the shipbuilding vote was before the House of Commons in Committee, on the 27th of July, 1906.

"The shipbuilding programme," said Mr. Robertson, "was the new programme of the last Admiralty (of which Lord Cawdor was First Lord) and of the late Government. I will remind the Committee of what it consisted. It was proposed, according to the official papers, to begin building this year four classes of new ships. Four of them—much the most important part of the whole programme—were described as armoured vessels. I think there is no doubt of the fact it was intended these four armoured vessels should be vessels of the *Dreadnought* type. Secondly, there were five ocean-going destroyers; thirdly, twelve coastal destroyers; and, fourthly, twelve submarines. The Board

of Admiralty has given this new programme the most anxious consideration during the period of five months which has elapsed since we laid the main estimates as a whole before the Committee. It is the unanimous opinion of the Board of Admiralty that the new programme I have detailed should be reduced in the following particulars:—Instead of four *Dreadnoughts* we propose to lay down only three; instead of five ocean-going destroyers we propose to lay down only two. We leave the coasting destroyers at the number of twelve; but we propose to reduce the number of submarines from twelve to eight.

HOW THE NEW VARIES FROM THE OLD PROGRAMME.

"What," continued Mr. Robertson, "is the financial effect of what we propose? The original new programme, as I detailed it, only called for the trifling expenditure of £645,000 in this year's Estimates. I propose to state to the House the amount of liability involved in the original new programme. For this purpose I am going to take in the provision for armaments. The liability in the original new programme of the Cawdor Memorandum was on Vote 8 £8,132,000. To that we have to add the correlative expenditure on Vote 9 for armaments, amounting to £1,210,000. The total liability of the new programme from beginning to end would therefore be a sum of about £9,340,000, spread over a period of years during which the programme was being carried out. In the case of the *Dreadnoughts*, it would be spread over at least two years, and the heaviest liability would be on the second year. I now want to state what is the corresponding liability in the revised new programme, which, on behalf of the Admiralty, I submit for the consideration of the House. Our new programme involves a total liability of £5,900,000 on Vote 8 alone, and if we add armaments, £6,800,000, roughly speaking. In other words, the effect of the revision is to reduce the total commitment of the new programme from £9,300,000 to £6,800,000—a reduction of £2,500,000."

THE HAGUE CONFERENCE AND THE SHIPBUILDING VOTE FOR 1907-8.

"I have now," Mr. Robertson proceeded, "to make something of a departure from the usual course, and to lift the veil in some respects from the Estimates of next year. In regard to next year, 1907-8, and in reference to the four armoured vessels which it was originally intended to lay down in the year, I have to make the following intimation. We propose in the Estimates of 1907-8 to make provision for two armoured vessels only as new shipbuilding; but with the proviso to be stated in the Estimates that a further armoured vessel will be laid down if the Hague Conference proves abortive in

reducing armaments. Further, the amount to be taken for the new armoured ships to be laid down in 1907-8 is to be limited to a small sum—so small that it will prevent their commencement till late in the financial year. This will emphasize to the Hague Conference the good faith of the British Government, and its desire to bring about a reduction of armaments."

THE "DREADNOUGHT" AND THE "LORD NELSON."

An outstanding event in the history of the Navy in 1906-7 was the commissioning of the *Dreadnought*, the largest battleship afloat, at Portsmouth, on September 1st, 1906. The *Dreadnought* was built at the Government yard at Portsmouth, and was in commission within eleven months of the laying of the first keel plate. As regards both size and rapidity of construction the new ship establishes a world's record. The *Dreadnought* is as unlike any of the most recently-built ships in the Navy as her armour and armament surpass them; for while she carries ten 12-inch guns, no battleship in any fleet carries more than four. These colossal weapons fire a projectile weighing 860 pounds, and are mounted in five barbets, which are protected by 12-inch armour plates. Besides the 12-inch guns, there are twenty-seven 12-pounder quick firers for resisting torpedo attacks. The ship is built in water-tight compartments, without doors; and each compartment is complete in itself—that is to say there is no intercommunication between them, and they can be approached only by way of the armoured deck. Electric lifts are provided in order to facilitate rapidity of movement from one part of the ship to another. The ship is equipped with turbine engines, built for a speed of 21 knots an hour; and she has four propellers, two on each side. The length of the *Dreadnought* is 490 feet; beam, 82 feet; draught, 26 feet 6 inches; displacement, 17,900 tons; horse power, 23,000; coal capacity, 2,500 tons; cost, £1,797,497.

The *Lord Nelson*, another battleship which was launched on Tuesday, September 4th, at Palmer's Shipyard, Newcastle-on-Tyne, is 410 feet long; beam, 79 feet 6 inches; draught, 27 feet; displacement, 16,500 tons; horse power, 16,750; speed, 18 knots; coal capacity, 1,800 tons; primary guns, four 12-inch and ten 9.2 inch; cost, £1,616,083.

THE GREAT WAR FLEETS OF THE WORLD.

Among the Parliamentary papers issued at the time the Naval Estimates were awaiting the attention of the House of Commons was a return (May 23, 1906) giving a comparative statement of the numerical strength of the fleets of Great Britain, France, Russia, Germany, Italy, the United States, and Japan. It was as follows:—

RECENT NATIONAL EXPENDITURES ON BATTLESHIPS.

Since the publication of the foregoing Parliamentary return—on July 30th, 1906—Mr. Lambert, Parliamentary Secretary to the Admiralty, in reply to a question in the House of Commons, stated that the tonnage and cost of battleships completed for sea during the six years 1900-1906 were as follows:—

	Tonnage.	Cost.
Great Britain.....	348,385	£25,538,041
France.....	44,285	4,086,347
Russia.....	164,726	14,173,330
Germany.....	143,122	13,237,105
United States.....	110,210	9,611,842

The following battleships, Mr. Lambert added, were then (July 30th) under construction:—Great Britain, 6; France, 6; Germany, 6; United States, 12.

A COMPARISON IN TONNAGE.

Tables prepared by the Naval Intelligence Department at Washington credited the eight naval powers with war tonnage as follows:—

	Tons Built.	Tons Building.
Great Britain.....	1,673,338	234,660
France.....	619,675	181,283
Germany.....	466,084	121,978
United States.....	388,519	313,278

Italy.....	266,728	73,700
Russia.....	244,601	131,094
Austria.....	122,756	21,200

In compiling the table no account was taken of vessels more than twenty years old, except such as have been

rebuilt or rearmed; of vessels authorized but not begun; of transports, colliers, repair ships, torpedo dépôt ships; of vessels of less than 1,000 tons, except torpedo boats; or of torpedo boats of less than 50 tons.

COLONIALS IN THE NAVY SERVICE.

It was reported to Parliament by Lord Tweedmouth (Memoranda by First Lord of the Admiralty, 20th February, 1906) that on the 1st of November, 1905, there were in the Colonial Royal Naval Reserves of Australasia 5 officers and 293 men; in that of Newfoundland, on the 31st of December, 1905, 560 men; and in that of Malta, on the 1st of January, 1906, 366 men—total for this reserve, 5 officers and 1,219 men.

THE NEW DISTRIBUTION OF THE BRITISH NAVAL FORCES.

One important incidental result of the war between Japan and Russia was a re-distribution of the British fleet. It was held by British naval experts that the war in the Far East clearly demonstrated the absolute necessity of concentration. Scattered ships, it is now held, merely court destruction at the hands of a relatively inferior but concentrated force. With the shifting of naval power it became necessary to shift the British forces, and this arrangement was accompanied by the withdrawal of inferior vessels, the strengthening of sea-going fleets, and immense improvements in the organization of the reserve, which has now become a really effective force. The new distribution, which became fully operative in 1905, is as follows:—

THE FLEET IN COMMISSION IN RESERVE.

The re-organization described in the preceding detail was effected at the end of 1904. On January 3rd, 1905, the new fleet in commission in reserve was constituted at the home ports—Devonport, Portsmouth and Chatham. It was the second stage of the naval re-organization scheme, promulgated after Sir John Fisher became Senior Naval Lord of the Admiralty. To-day, as since January 3rd, 1905, the British Navy consists of two divisions, the fleet in commission at sea, and the fleet in commission in reserve. The importance of the new fleet is that it is in commission. The ships are partially manned and are kept in working order with stores on board, ready to go to sea on short notice, whereas the old fleet reserve ships were out of commission and lay empty and inactive in dock and basin.

THE EMERGENCY SQUADRON AND SPECIAL RESERVE.

Besides this fleet in reserve in commission, there is an emergency squadron and a special reserve. Of the emergency squadron, there are six battleships and six cruisers—two of each type of warship at the home ports, Devonport, Portsmouth, and Chatham, which can be at once manned without mobilization, the crews being formed from the floating surplus personnel at each port. The whole squadron can be ready for service at very short notice.

COLONIAL CONTRIBUTIONS TO THE NAVY.

India contributes £103,400 a year towards the maintenance of His Majesty's ships in Indian waters. The Commonwealth of Australia pays £200,000; New Zealand, £40,000; Cape Colony, £50,000; and Natal, £35,000. No contribution is made to the Fleet by the Dominion of Canada.

Newfoundland, as her contribution to the navy, maintains a branch of the Royal Naval Reserve, which entails upon her an expenditure of £3,000 a year. The total contribution of India and the Colonies to British naval expenditure is £431,400.

Under agreements with the great shipping companies, sixty-two vessels are now on the Royal Naval Reserve and Merchant Cruisers' List. Thirty-one of these ships receive subsidies from the Government, and are authorised to fly the Blue Ensign. The other thirty-one are held at the disposal of the Admiralty without subventions.

The cost of the Fleet—maintenance and new construction—now averages 17s. 6d. per head of the population of the British Isles, as compared with 5s. 10d. per head in 1870.

SERVICE IN THE NAVY.

Like the British Army the Navy is manned by volunteers, and there is no compulsory service in connection with it. A large proportion of the seamen enter the service as boys. They are accepted for training-ships up to the age of eighteen, and when a boy reaches the age of eighteen his term of actual service in the Navy begins, and must last for at least twelve years. To be accepted for a training-ship, a boy between the age of fifteen and fifteen and a half must be five feet and half an inch in height, with a chest measurement of thirty and a half inches. The height measurement is made without shoes. If accepted when between fifteen and a half and sixteen a boy must be five feet and one and a half inches in height, and thirty-one inches round the chest. Between sixteen and sixteen and a half a boy must be five feet two and a half inches in height, and thirty-one and a half inches round the chest.

The pay of seamen ranges from one shilling and three pence a day for ordinary seamen, to nine shillings a day for chief gunners and boatswains. Men who have put in nine years' service in the Navy can pass into the Coast Guard Service. Those who stay in the Navy for a period of twenty-two years become entitled to pensions. The amount of pension is from eighteen pounds a year, upwards, according to the rating on retiring from the ranks. The average pension for men of all ranks is £31 a year.

The Naval Reserve, as the result of changes which were made in 1901-2, is now of two branches, the Royal Naval Reserve and the Royal Fleet Reserve. The Naval Reserve is composed of men ordinarily in the merchant service, who put in a certain number of days training each year on board coast-guard ships, and who are liable to be called upon for service afloat in the event of war. The Fleet Reserve consists of men who have served twenty-two years in the Royal Navy and earned pensions, and of men who have served twelve years in the navy and have then transferred themselves to the Fleet Reserve.

GRAVING DOCKS IN CANADA.—There are four graving docks in Canada, three belonging to the Federal Government and one owned by a company. For 20 years from the completion the company has subsidies from the Imperial and Canadian Governments and from the city of Halifax, where it is located, amounting in all to about \$30,000 (£6,180), of which the Canadian Government pays \$10,000 a year. The following statement shows the dimensions of these graving docks:—

MILITIA AND DEFENCE OF CANADA

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present none remain.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Sovereign, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, especially in 1904, when a new Militia Act was passed (ch. 23, 4 Ed. VII.). By it the Militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Members of the King's Privy Council for Canada, Judges, Members of the Executive Councils of Provinces, Deputy Ministers of the Federal and Provincial Governments, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The Active Militia, or any portion thereof, may be ordered to drill or train for a period of not more than 30 days in each year.

The Militia is divided into Active and Reserve Forces. The Active force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service, for the Active Militia, is three years; for the Reserve Militia, such as is prescribed,

THE MILITIA PENSION ACT, 1901.

CANADIAN TEAMS TO WIMBLEDON AND BISLEY AND OFFICERS THEREOF FROM 1872 TO 1906.

Canada has always been represented by a team of its best shots at the annual Prize Meeting of the National Rifle Association of England. The first matches were held in 1872, at Wimbledon, but since 1890 they take place at Bisley. The most coveted of all prizes, the Queen's—now the King's prize (£250), was won twice by a Canadian: Pte. T. H. Hayhurst, 13th Regiment, Hamilton, Ont., in 1895, and Pte. J. S. Perry, 6th Regiment, D. C. O. R., Vancouver, B.C., in 1904. Many other important prizes have also been captured by our countrymen. The Kolopore Cup, contested for by the Mother Country and the Colonies was won eight times by the Canadians: in 1872, '75, '81, '84, '89, '96, 1905, and 1906. Eight men compose the team.

Canada sends to Bisley twenty representatives to take part in the various matches open to them, and these men are selected by competition held at Ottawa under the Dominion of Canada Rifle Association.

The first twenty on the list for the meeting of 1907 are:—

Brayshaw, Sgt. A., 5th Regt., Canadian Art'y.
 Crowe, Staff-Sgt. C. R., 30th Regt.

THE CANADIAN MILITARY RIFLE LEAGUE.

(HEADQUARTERS, OTTAWA, ONT.)

In 1893 the Canadian Rifle League was formed, with Headquarters at Toronto, the moving spirit and chief organizer being Lieut. W. R. Pringle, of the 10th Regiment, Royal Grenadiers. Rifle associations from all over the Dominion affiliated, and a series of simultaneous matches on given dates was inaugurated. In 1895, the Honorable the Minister of Militia and Defence granted free ammunition to the League teams, and with one exception this has been the rule since.

Four matches are held annually over King's ranges (200, 500 and 600 yards), and prizes given to the leading teams. The Lee-Enfield rifle is used. Marksmen's certificates, signed by the Minister of Militia and Defence, and the Chief of the General Staff, are issued as follows:—

For an average of 94 points out of a possible 105, a first-class special certificate; for 90 points, a first-class certificate; for 80 points, a second-class certificate.

The competitions are divided into three series, as follows:—

The first (military) for teams of city corps of the Active Militia; the second (military) for units other than city corps; the third, or civilian series, for teams of Civilian Rifle Associations. The entrance fee per team is \$10. Fees for additional teams from the same organization, \$5 each. Organizations bringing five new men to the Dominion of Canada Rifle Association Meeting get free entry for one team to the C.M.R. League competitions for the following year.

By Militia Order of June 10, 1903, the C.M.R. League was placed under the supervision of the Militia Department, Ottawa.

The annual meeting of the League takes place at Ottawa during the D. R. Association competitions.

THE ROYAL MILITARY COLLEGE

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact, it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and, in addition, there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control, and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Seven commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from \$750 to \$800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Secretary of the Militia Council, Ottawa, Ont.

POSTAL INFORMATION.

For List of Officials of Post Office Department, see page 269.

Letter Rates, &c.

Canada.—Letters posted in Canada, addressed to any place within the Dominion, 2 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by postage stamps.

Post Cards.—From any place in Canada to any place in Canada or to the United States or Mexico, 1 cent each. British and Foreign, 2 cents each.

Private Post Cards.—The face of a Private Post Card may be used for advertisements, illustrations, etc., provided that a clear space of at least $\frac{1}{4}$ inch is left along each of the four sides of the postage stamp, and a clear space $3\frac{1}{2}$ inches long and $1\frac{1}{2}$ inches wide reserved for the address at the lower right hand corner of the card. Private Post Cards must not exceed a size of 6 inches in length by $3\frac{5}{8}$ inches in width. Cards exceeding these limits are treated as insufficiently paid letters. The words "Private Post Card" must be written or printed on the face of private post cards addressed to places outside of Canada.

Pictorial Private Post Cards which have communications on address side.—Cards which have the back covered by a picture, and one-half of the front to the left of the address space reserved for written communications, are admitted as post cards when addressed to places in Canada, the United States, Mexico, Great Britain, France, Switzerland, Italy, Austria, Montenegro, Persia, Roumania, Belgium, Congo Free State, Denmark, Danish West Indies, Egypt, Luxembourg, Norway, Sweden, Netherlands, Hungary, Crete, Hayti, Germany, Portugal, Bulgaria, Transvaal, Orange River Colony, Australia, New Zealand, Holland, Dutch East Indies, Panama, Siam, Bosnia-Herzegovina, Japan, Paraguay, and Tunis. The rate for Canada, Mexico and the United States, one cent, and for the other countries two cents. A few of the countries mentioned above do not yet forward the cards described at post card rate, although they have agreed to accept and deliver such cards coming from other countries prepaid at that rate.

United Kingdom, and the following British Possessions and Protectorates: Aden, Ascension, Australia, Bahama Islands, Barbados, Bermuda, British Central Africa, British East Africa, British Guiana, British Honduras, British India, British North Borneo Company's Territory (including Labuan), Cape Colony, Cayman Islands, Ceylon, China (British Postal Agencies in), viz., Amoy, Canton, Chefoo, Foochow, Hankow, Hoihow, Liu-Kung-Tau (Wei-Hai-Wei), Ningpo, Shanghai and Swatow; Cyprus, Fanning Island, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast Colony, Hong Kong, Jamaica, Johore, Lagos, Leeward Islands, Malay States, Malta, Mauritius, Natal, Newfoundland, New Zealand, Nigeria (Northern), Nigeria (Southern), Orange River Colony, Sarawak, Seychelles, Sierra Leone, Somaliland Protectorate, Straits Settlements, St. Helena, Tobago, Transvaal Colony, Trinidad, Turks Islands, Uganda, Windward Islands, Zanzibar, and Egypt, including the Soudan (after 1st January, 1907).—Postage on Letters, 2 cts. per half oz.

Foreign Countries, except United States and Mexico.—Postage on Letters, 5 cents per half oz. If sent unpaid, double postage will be charged.

United States and Mexico.—The rate on letters to the United States and Mexico is the same as in Canada, and at least one rate (2 cents) must be prepaid.

It is very important to bear in mind that the postage upon letters for the United Kingdom and all Foreign Countries, except United States and Mexico, is calculated by the *half ounce* and *double* the deficient postage is charged on all unpaid or short-paid letters.

Express or Special Delivery Letters.—Arrangements have been made for the delivery by special messenger daily, except Sunday, of letters bearing, in addition to the usual prepayment of two cents an ounce, a "Special Delivery" stamp addressed to the following cities in Canada: In Ontario—Toronto, Hamilton, London, Brantford, Kingston and Ottawa; in Quebec—Montreal and Quebec; in New Brunswick—St. John and Fredericton; in Nova Scotia—Halifax; in Manitoba—Winnipeg; in British Columbia—Victoria and Vancouver. The "Special Delivery" stamp required for this purpose is of the value of ten cents, and may be obtained at any post office.

Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

Insurance of Registered Letters.

Registered letters posted at and addressed to any P.O. within the Dominion of Canada may be insured against loss for amounts not exceeding \$25. The insurance fee as well as the ordinary postage and the registration fee must be prepaid in postage stamps on all insured registered letters. The insurance fees and the corresponding limits of compensation are as follows:—

Insurance Fee.	Limit of Compensation.

Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 10 lbs. is allowed); for foreign post, 4 lbs. Limit of size, domestic: 30 inches in length by 1 foot in width or depth; foreign: two feet in length, by one foot in width or depth.

Book packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

Books for the use of the blind are free of Canada postage, and correspondence passing between blind persons in raised characters is chargeable at the rate of 1 cent per 2 ozs.

The rate on Book Packets for delivery in Canada, Great Britain, the United States and all Postal Union Countries, is 1 cent per 2 ozs.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom and other countries by Book Post:—

Matter (other than newspapers and periodicals), wholly in print without reference to process, such as circulars, catalogues, calendars, hand-bills, books, pamphlets, printed forms, maps, prints, drawings, plans (without written specifications) engravings, lithographs, photographs (when not on glass or in cases containing glass) official or private post cards in quantities, sheet music (whether printed or written) instruction books in music, visiting cards, the manuscript of books or newspapers (whether hand-written or type-written) indented or perforated sheets of paper containing characters which can be read by the blind, botanical entomological and mineralogical specimens and the following partly-written and partly-printed matter:—militia and school returns, customs manifests, voters' lists, school or college examination papers, printers' proof sheets with corrections, exhibition entry tickets, municipal assessment rolls, Dominion and Provincial Government returns on official blanks, and all Dominion and Provincial Government documents, statute labor returns and municipal returns in general, etc., on which the rate of postage is 1 cent for each 2 ozs. or fraction thereof. To come within this class the material printed upon must be either paper, cardboard or parchment.

The following articles are subject to the rate of 2 cents for the first 4 ozs. or fraction thereof, and one cent for each additional 4 ozs.:—Seeds, cuttings (but not cut flowers), roots, bedding plants, scions or grafts.

Writing paper specially prepared for the use of the blind transmitted from a recognized Institution for the Blind in Canada to blind persons for their own use is allowed to pass at the rate of 1 cent for each 4 ozs. or fraction thereof; but before any Institution can post such paper at the above rate the Post Office Department at Ottawa must be satisfied as to its claim to be considered an Institution for the Blind.

No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage when posted for delivery within the Dominion of Canada.

Printed or written *requests for return* are recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, the United States, Mexico, the United Kingdom, the Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo, Ceylon, Cyprus, Falkland Islands, Fige, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, and Newfoundland, and to newsdealers in Canada, is fixed by law at $\frac{1}{2}$ cent per pound, provided the distance in Canada which any such newspapers or

periodicals are required to be transmitted does not exceed 300 miles from the place of publication. If the distance in Canada exceeds 300 miles from the place of publication the postage rate is $\frac{1}{2}$ cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not *less* frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, or in the United Kingdom, or the British Possessions mentioned above, or the United States or Mexico, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing less than 1 oz. each may be posted singly, if prepaid by Postage Stamp $\frac{1}{2}$ cent each.

The postage on *bona fide* specimen newspapers, and on papers and periodicals published less frequently than once a month, is 1 cent per lb.

British and foreign publications may be posted by newsdealers in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, the United Kingdom, Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo; Ceylon, Cyprus, Falkland Islands, Fige, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Newfoundland, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, or the United States or Mexico, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not having saleable value and not exceeding 3 lbs. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent for each 2 ozs. or fraction thereof under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided at least 1 cent is prepaid.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade

marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Articles of saleable value even when intended to serve as samples are not admissible at sample rate.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

Useful Hints.

Register all valuable letters. Transmit money by Postal Notes or Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right-hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. Every Parcel must be fully prepaid by postage stamps.

2. The dimensions of a Parcel addressed to the United Kingdom must not as a general rule exceed 30 inches in length or 1 foot in width or depth, nor must the combined length and girth of any parcel exceed 6 feet, a length of 3 feet 6 inches is allowed, however, in the case of parcels containing articles such as golf sticks, umbrellas, etc. The dimensions of a Parcel addressed to any country other than the United Kingdom must not exceed 2 feet in length by 1 foot in width or depth.

3. A Parcel must not contain a letter or any writing in the form of a letter, or any explosive, combustible, or dangerous articles.

4. All Parcels must be securely and substantially packed and closed.

5. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

6. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

7. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel; also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed*.

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fourth Class Matter.

Postage rate 1 cent per ounce or fraction thereof, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

Foreign Post—Commercial Papers.

"Commercial Papers" are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll, when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

POST OFFICE MONEY ORDERS.

In sending money by mail it is always best to transmit by Money Order if possible.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use “Bullinger's Postal and Shippers' Guide for the United States and Canada” in the preparation of the following list:—

POST OFFICES AND RAILROAD STATIONS IN THE DOMINION OF CANADA.

*The Offices printed in Italics are authorized to grant and pay Money Orders and Postal Notes. The Offices marked * are Savings Bank Offices. Offices marked † are authorized to issue and pay Postal Notes. (The number of Post Offices, not being Money Order Offices, authorized to issue and pay Postal Notes, is being increased every month so that many Post Offices besides those now indicated by a † in the list will issue and pay Postal Notes.) Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus:—O, Ontario; Q, Quebec; N S, Nova Scotia; N B, New Brunswick; P E I, Prince Edward Island; M, Manitoba; B C, British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan.*

The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the place or nearest railway station is situated. See list of Railroads and Steamboats on pages 156 to 160.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada" in the preparation of the following list:—

In the foregoing list the asterisk denotes members of the British House of Lords entitled to the designation of "Right Honourable." Barons Aylmer and de Blaquière are of the peerage of Ireland and not members of the House of Lords. The title of Baron de Longueuil existed prior to the Treaty of Paris (1763), and was duly recognized by Queen Victoria pursuant to that treaty. Sir Wilfrid Laurier, Sir Richard Cartwright and Sir S.

H. Stroug are styled Right Honourable as members of the English Privy Council. Members of the Canadian Privy Council are designated above by a † and have also the title of Honourable. Judges are distinguished by a † and are also by courtesy or custom Honourable. The English practice is to give the title of Knight Bachelor to members of the Judicial bench, and the Attorney and Solicitor-Generals. *** Senator; hence, honourable.

For list of Companions of the Imperial Service order, see page 245.

The Order of Baronets, the lowest hereditary rank, was instituted in 1611; a Baronet is designated "Sir John Smith, Baronet"—usually written Bart. Taking precedence of Baronets are members of The Most Honourable Privy Council, who are addressed "Right Honourable."

The Order of the Bath, instituted in 1399, and revived in 1725, is divided into three classes—Knights Grand Cross, G.C.B.; Knights Commanders, K.C.B.; and Companions, C.B.

The Order of St. Michael and St. George, instituted in 1818, has also three classes—G.C.M.G., K.C.M.G., and C.M.G.

The Royal Victorian Order, instituted in 1896, has five classes—G.C.V.O., K.C.V.O., C.V.O. Members 4th and 5th classes—M.V.O. Col. S. B. Steele, C.B., M.V.O., is a member of the 4th class.

In all Orders of Knighthood the Knights Grand Cross and the Knights Commanders have the prefix "Sir" with the initials of their class following the name. Companions and Members bear no title, but have the letters C.B., C.M.G., C.V.O., M.V.O., as the case may be, attached to their names.

Knights Bachelors are gentlemen who have received the honour of Knighthood, and are entitled to the prefix "Sir" and to "Knt." after name.

It follows that members of any order of Knighthood may be entitled to several prefixes and affixes, as: Field Marshal The Rt. Hon. Earl Roberts of Kandahar, Pretoria, and Waterford, K.G., K.P., G.C.B., G.C.S.I., G.C.I.E., V.C.; The Rt. Hon. Sir Wilfrid Laurier, G.C.M.G.; The Hon. Sir C. Tupper Bart, G.C.M.G., C.B.

THE IMPERIAL SERVICE ORDER.

This civil order of distinction was instituted by King Edward VII, August 8, 1902, to more fully recognize the faithful and meritorious services rendered by members of the Civil Services of the various parts of the Empire. The following is a synopsis of the statutes relating thereto:—

- (a) Name.—The Imperial Service Order.
- (b) Consists of the Sovereign, the Prince of Wales, and such Companions as may be appointed.
- (c) Only members of the administrative or clerical branches of Civil Services are eligible to Companionships.
- (d) Number of Companions.—Limited to 425, of whom 250 for the home Civil Service and 175 for Civil Services of Colonies and Protectorates.
- (e) Eligibility.—At least twenty-five years' meritorious service. In Colonies or Protectorates recognized as unhealthy, it is reduced to sixteen years. The periods are not compulsory in special cases of *eminently* meritorious service.
- (f) Description of decoration.—A badge or medallion of gold and enamel, bearing on one side the Imperial and Royal Cypher, and on the reverse "For Faithful Service," both in dark blue enamel on a plaque or shield of Gold, surrounded by a wreath of laurel, surmounted by the Imperial Crown.
- (g) Decoration to be worn on left breast suspended by a ribbon one inch wide.
- (h) Names of those upon whom the decoration is conferred will be published in the *London Gazette*.
- (i) Companions have the privilege of adding the letters "I.S.O." after their names.
- (j) Members of this order are not deprived of eligibility to other orders of knighthood, and *vice versa*.

THE IMPERIAL SERVICE MEDAL.

It is also provided that members not eligible for companionships in the Imperial Service Order may, on retirement after service of twenty-five years or sixteen years, as above explained, receive the "Imperial Service Medal," which is of silver and of a design similar to that of the badge of the Companions of the Imperial Service Order.

THE OFFICE OF PRIME MINISTER.

By Royal Warrant dated December 6th, 1905, an important change was made in the status of the Prime Minister. Until 1894 the office of Prime Minister, although it had existed for so long, had no official recognition. "Departmentally," Mr. Gladstone once wrote in reference to the Prime Minister, "he is no more than the first-named of five persons by whom jointly the powers of the Local Treasurerships are to be exercised. He is not their master, or otherwise than by mere priority their head, and he has no special function or prerogative under the formal constitution of the office. He has no official rank, except that of Privy Councillor. Eight members of the Cabinet, including five Secretaries of State and several other members of the Government, take official precedence of him. His rights and duties as head of the administration are nowhere recorded. He is almost, if not altogether, unknown to the statute law."

The first official recognition of the office came on March 3rd, 1894, when the "Court Circular" stated that Queen Victoria had offered to the Earl of Rosebery the "post of Prime Minister, vacated by the Right Hon. W. E. Gladstone, M.P." Even after this first official recognition the precedence of the Prime Minister was not determined; and there was no determination of his precedence until the Royal Warrant of December 6th, 1905, which announced "our Royal will and pleasure that in all times hereafter the Prime Minister of us, our heirs and successors, shall have precedence next after the Archbishop of York." Consequently the Prime Minister now has his place between the Archbishop of York and the Lord Chancellor of Ireland, and precedence over every member of his Government except the Lord Chancellor.

THE GOVERNMENT DEPARTMENTS.

THE TREASURY.

Chancellor of the Exchequer—Rt. Hon. Herbert Asquith.
First Lord of the Treasury—Rt. Hon. Sir H. Campbell-Bannerman.
Financial Secretary to the Treasury—Mr. R. McKenna.
Patronage Secretary to the Treasury—Mr. George Whiteley.
Junior Lords of the Treasury—Mr. J. A. Pease, Mr. Herbert Lewis, Capt. Cecil Norton.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the First Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Patronage Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

THE FOREIGN OFFICE.

Secretary of State for Foreign Affairs—Sir Edward Grey.
Under Secretary—Lord Fitzmaurice.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is usually of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Secretary of State, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

THE COLONIAL OFFICE.

Secretary of State for the Colonies—Earl of Elgin.
Under Secretary—Mr. Winston Churchill.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary at War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. India and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Jamaica. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies.

THE INDIA OFFICE.

Secretary of State for India—Rt. Hon. John Morley.
Under Secretary—Rt. Hon. J. E. Ellis.

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of His Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

THE HOME OFFICE.

Secretary of State for Home Affairs—Rt. Hon. Herbert Gladstone.

Under Secretary—Mr. Herbert Samuel.

The Home Department has the control of the London police force, and also the oversight of the police forces in the counties and municipal boroughs; and, generally speaking, the Department is responsible for the internal peace of the country. Prisons, convict establishments, criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining.

THE WAR OFFICE.

Secretary of State for War—Rt. Hon. R. B. Haldane, K.C.

Under Secretary—Earl of Portsmouth.

Financial Secretary to the War Office—Mr. T. R. Buchanan.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

THE ADMIRALTY.

First Lord of the Admiralty—Lord Tweedmouth.

Secretary to the Admiralty—Rt. Hon. Edmund Robertson, K.C.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are officers without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are directed by the Foreign Office and the Colonial Office.

THE BOARD OF EDUCATION.

President—Rt. Hon. Augustine Birrell.

Secretary—Mr. Thomas Lough.

The Education Department exercises supervision over the various departments of state-aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President was always of the House of Commons, and he was practically the Minister of Education. On the 1st of April, 1900, the Committee of Council for Education came to an end, and the powers it had exercised since 1839, enormously increased, however, since 1870, were transferred to a new State Department known as the Board of Education. The new Board was created under an Act of Parliament passed in the ordinary session of 1899. It consists of a President, the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. With the creation of this new Board there was for the first time a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council had been concerned chiefly with elementary education, except as regards the Science and Art Department. Now, however, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there was also created a Consultative Committee, which was to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are represented on the Consultative Committee. At the formation of the Balfour Government in 1902, and the retirement of Sir J. Gorst, Vice-President, the Marquis of Londonderry became the first President of the Board and Sir W. R. Anson the first Secretary.

THE LOCAL GOVERNMENT BOARD.

President of the Local Government Board—Rt. Hon. John Burns.

Parliamentary Secretary to the Local Government Board—Mr. Walter Runciman.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

THE BOARD OF TRADE.

President of the Board of Trade—Rt. Hon. D. Lloyd-George.

Parliamentary Secretary to the Board of Trade—Mr. H. E. Kearley.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines and electric lighting. The

Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

THE POST OFFICE.

Postmaster-General—Rt. Hon. Sydney Buxton.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

THE BOARD OF AGRICULTURE.

President of the Board of Agriculture—Earl Carrington.

The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

OFFICE OF PUBLIC WORKS AND BUILDINGS.

First Commissioner of Works—Rt. Hon. Lewis Harcourt.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Palace at Westminster, the Law Courts, and the public offices at Whitehall.

DEPARTMENT OF THE LORD CHAMBERLAIN.

Lord Chamberlain—Viscount Althorp.

Comptroller of the Household—Sir Edward Strachey.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

IRISH AND SCOTCH DEPARTMENTS.

Chief Secretary for Ireland—Rt. Hon. John Morley.

Secretary for Scotland—Rt. Hon. John Sinclair.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

Officers of the House of Commons.

Rt. Hon. James William Lowther, elected Speaker in June, 1905 (salary £5,000), was unanimously re-elected on the opening of the new parliament. Mr. Alfred Emmott became Deputy Speaker and Chairman of Committees of Ways and Means (salary £2,500). Sir Courtenay Peregrine Ilbert remains Clerk of the House (salary £1,800); Henry David Erskine, Sergeant-at-Arms (salary £1,000); and the Venerable A. B. O. Wilberforce, Speaker's Chaplain, with a salary of £400.

MINISTERIAL PENSIONS.

Pensions are granted to ex-holders of Ministerial offices whose private fortunes are inadequate to their maintenance in their station in life. The number of these pensions, the three classes into which they are grouped according to offices held—£800, £1,500, £2,000 a year—and the conditions governing their award are determined by the Political Offices Pensions Act of 1869 (32 and 33 Victoria, c. 60)—an Act which was passed as an amendment to the Pensions Act of 1834. On the eve of the retirement of the Balfour Government—5th December, 1905—pensions of £2,000 were being paid to Lord Cross (since 1887), and to Lord George Hamilton (1892). These are first-class pensions. Second-class pensions of £1,500 a year were at that time being paid to Sir Michael Hicks-Beach, Mr. Henry Chaplin, Sir John Gorst, and Lord Balfour of Burleigh. As there can be only four pensioners in any of the three classes this class was full when the Balfour Administration was coming to an end; but Sir Michael Hicks-Beach was at this juncture made a peer. He became Lord St. Aldwyn and resigned his pension, which by warrant dated December 5th, was bestowed on Mr. Gerald Balfour, who in Mr. Arthur Balfour's Government had been President of the Local Government Board.

THE BRITISH PARLIAMENT.

The Balfour Government resigned on the 5th of December, 1905. Sir Henry Campbell-Bannerman, who had been leader of the Liberal Opposition in the House of Commons since February, 1899, formed a Liberal Administration, and the General Election took place in January, 1906. The British House of Commons, since the Franchise and Redistribution Acts of 1834-5, consists of 670 Members. Geographically, the seats held by these Members are distributed as follows:—

England	465
London	61
Boroughs	165
Counties	234
Universities	6
Wales	30
Boroughs	11
Counties	19
Scotland	72
Boroughs	31
Counties	39
Universities	2
Ireland	103
Boroughs	16

Total	670

Qualifications for the Parliamentary franchise are various, but generally speaking the franchise is on a democratic basis; so much so, that it is possible for every man who is a householder, and who has been in occupation for a year previous to the enrolment of electors, to vote at a Parliamentary election. There is also a lodger franchise; but in this case the franchise is based upon the rental value of the rooms. It is also

governed by the conditions of the tenancy, and but comparatively few men qualify for the lodger franchise, which, unlike the householder franchise, must be claimed every year. A recent decision in the law courts, *Kent v. Tital*, 1905, has brought into prominence the occupier franchise, which is granted to men renting rooms over which they have complete control. These men are not lodgers, and they hold the franchise on the

same basis as the householder. Tens of thousands of working men voters were added to the electoral lists in 1906 as a result of this decision.

The electoral rolls are compiled by the local overseers of the poor, as most of the franchises are based on the payment of the poor rate. The rolls are then gone over in open court by the revising barristers, who hold their sessions every year, as a new list of voters is compiled each year. In England the new register comes into effect on December 1st.

Members of the House of Commons receive neither salaries nor indemnities. There are no mileage allowances or railway privileges, and Members do not enjoy the privilege of franking their correspondence through the mails.

Parliamentary candidates pay all the costs of elections, including the returning officer's fees and expenses. Deposits to cover these outlays must be made to the returning officer before a candidate can go to the poll. In the counties, the High Sheriffs, or their deputies, act as returning officers. In the self-contained boroughs—that is, in the boroughs which return Members, and are not part of a county division—the Mayor acts as returning officer.

Elections are not held all on one day. A general election usually extends over a month, and, if an elector is qualified in several constituencies, he can vote in each. Only freeholder voters can exercise the franchise in this way, as residence is not a necessary qualification for a freehold vote.

At the general election in January, 1906, the questions at issue were Fiscal Reform (Mr. Chamberlain's proposal to return to Protection); Chinese Labour on the Rand, which arose on the Balfour-Milner ordinance of 1904; and Elementary Education, or rather that aspect of this subject which affected the relationship of the Established Church and the Roman Catholic Church to public elementary schools which are maintained entirely by local and Imperial taxation.

On August 11th, 1905—that is, on the last day of the last session of the Parliament elected in September and October, 1900—the political constitution of the House of Commons stood as follows:—

Conservatives	312
Liberal Unionists	58
Liberals	217
Irish Nationalists	82
Speaker	1
Total	670
Unionist Majority	71

After the General Election of 1900, the Salisbury Administration had a majority over Liberals and Irish Nationalists of 134.

As the result of the General Election in January, 1906, the Campbell-Bannerman Government was continued in office, and began the Parliamentary session with a majority of 241 over the combined vote of the Conservatives, Liberal Unionists, and Irish Nationalist Members.

Mr. Speaker Lowther was of the Tory Party when he was elected to the Chair in 1905. As has now long been the usage at Westminster, he was re-elected at the opening of the new Parliament. Counting the Speaker as still of the Tory party, the political constitution of the House of Commons at the beginning of the session of 1906 was made up thus:—

Liberals	372*
Labour	57
Conservatives	130
Liberal-Unionists	28
Irish Nationalists	83
Total	670

* Up to the time these pages of the *Canadian Almanac* went to press only one by-election had gone against the Liberals; and when Parliament met on October 23rd, 1906, for the winter session, the strength of the Liberals was 371.

Not since the beginnings of modern Liberalism at the time of the American Revolution has the Liberal party been supported by so large a majority in the House of Commons.

The Labour Members are divided into three groups:— (1) Fourteen miners' representatives, (2) fourteen Liberal Labour Members, and (3) twenty-nine members of the Independent Labour party. Members of the first group (the miners' representatives) have been of the House of Commons since 1868, when the Right Honourable Thomas Burt and the late Mr. Alexander Macdonald (both of them miners' trade union officials) were returned.

The second group is composed of Liberals who are closely associated with the Labour movement; while the third group represents the Independent Labour Party, which was organized in 1901, and was represented in the last House of Commons by Mr. Keir Hardie, the leader of the movement, and three other members. The miners' members and the Liberal-Labour members sit on the Government Benches, answer to the Government whips, and act generally with the Government.

Mr. Keir Hardie and his colleagues sit with the Nationalist Members on the Opposition side of the House of Commons. This group has its own whips, and, while usually voting with the Government, its members hold themselves at arm's length from it, and keep aloof from Liberal organizations in and out of Parliament. This new group advocates old age pensions, adult suffrage, and the establishment of an eight-hours' day by legislative enactment, and, broadly speaking, it is representative of the Socialist movement in England in its more immediately practical forms.

THE HOUSE OF LORDS.

Only in so far as concerns Scotland is the House of Lords affected by a general election. After a dissolution of Parliament, the Scotch Lords meet at Holyrood Palace, and in accordance with the terms of the Act of Union elect sixteen peers to represent them in the House of Lords. At the election on the 30th of January, 1906, at which the Duke of Montrose (Lord Clerk) presided, the following Peers were chosen:—

Earl of Mar.	Viscount Falkland.
Earl of Morton.	Baron Saltoun.
Earl of Mar and Kellie	Baron Sinclair.
Earl of Haddington.	Baron Torpichen.
Earl of Lauderdale.	Baron Balfour of Burleigh.
Earl of Leven and Melville.	Baron Belhaven and Stenton.
Earl of Carnwarth.	Baron Borthwick.
Earl of Dundesk.	
Earl of Dundonald.	

All these Peers are Conservatives, and the only change was the substitution of Lord Borthwick for Lord Forbes, who was of the last Parliament, but declined re-election. The Irish Peers, who number twenty-eight, are elected for life.

At the time the Balfour Government went out of office in December, 1905, there were 612 Peers. Of these, 537 were hereditary Peers of the United Kingdom, 5 were life Peers (the law lords), 26 were Archbishops and Bishops, 16 were Scotch representative Peers, and 28 were Irish representative Peers. On the formation of the Campbell-Bannerman Government, Mr. R. T. Reid went up to the House of Lords as Lord Chancellor, with the title of Baron Loreburn. In January and February, 1906, there were other creations of Peers; and on the 28th of June, at the anniversary of the King's Birthday, six new Peers were created. In all since the accession to office in 1905 of the Campbell-Bannerman Government, 16 new Peers have been created, all of whom are Liberals. Their creation brings up the number of Liberal Peers to 90. The total voting strength of the House of Lords, after these additions had been made, was 615, as twelve of the hereditary Peers were minors, and there is one case of contested succession.

BRITISH IMPORT DUTIES, 1906-7.

In view of the continued agitation in Great Britain for a return to the Protective System which was abandoned in the fifties of the nineteenth century, and of the important part which this propaganda had in the general election of 1906, the editor of THE CANADIAN ALMANAC has deemed it well again to include in the issue for 1907 the Import Tariff of Great Britain, as it stood after the alterations which were made in the British Budget for 1906-7. The only important changes made by the Budget (submitted to the House of Commons, on April 30th, 1906) were the repeal of the export duty on coal—one shilling a ton—first imposed as a war tax in 1902; and the reduction from sixpence to fivepence per pound in the duty on tea. The income tax, which, at varying rates, has been continuously levied in England and Scotland since 1803, and in Ireland since 1853 (Vict. 16 and 17, C. 34, s 5) remains for the fiscal year 1906-7, at one shilling in the pound, at which rate it has stood since the Budget of 1904-5. As the Tariff stands to-day all the duties are for revenue only; and up to the end of the Parliamentary session of 1906 no changes had been made in the Tariff with a view to the protection of agriculture or of any other British industry. For all practical purposes Great Britain is on a free trade basis.

BRITISH TAXATION AND INDEBTEDNESS.

The estimated receipts from taxation in the United Kingdom for the years 1906-7 are:—

Customs	£34,230,000
Excise	30,200,000
Death Duties	13,200,000
Stamps	8,150,000
Land Tax	700,000
House Duty	1,950,000
Property and Income Tax	31,500,000

Total Tax Revenue..... 119,930,000

Post Offices	17,500,000
Telegraphs	4,350,000
Crown Lands	480,000
Suez Canal, etc.	1,100,000
Miscellaneous	1,500,000

Total Revenue..... 144,860,000
 Net Increase..... 882,000

Customs and excise duties are levied on many articles of food and drink (see British Import Duties, page 260), although all these duties are imposed for revenue only. An outstanding feature in recent British Budgets is the falling off in revenue due to a declining consumption of alcoholic beverages. In 1905-6 revenue was collected on 11,800,000 gallons of wine as compared with 17,150,000 in 1899-1900; on 8,780,000 gallons of foreign and colonial spirits, as compared with 9,350,000 gallons in 1899-1900. on 32,490,000 gallons of British-made gin and whiskey as compared with 38,716,000 gallons in 1899-1900; and on 33,500,000 barrels of beer as compared with 36,500,000 barrels in 1899-1900. "These figures," said Mr. Asquith, the Chancellor of the Exchequer, in unfolding his Budget to the House of Commons on the 30th of April, 1906, "were made more striking by the fact that there

had been an increase in the population of the country during that period of between two and three millions." While hoping that the main cause of the decreased consumption of alcohol was temperance, Mr. Asquith pointed out that the spending power of the community had been decreased by the increased taxation and the expenditure due to the South African war.

At the end of the financial year 1905-6 the National Debt stood at £789,990,187 as compared with £796,730,490 at the end of 1904-5. Since 1860 the lowest point at which the National Debt has stood was at £635,640,965 at the end of the financial year 1898-99. In 1860 it stood at £827,723,163.

The revenue and expenditures for 1905-6 and the estimated revenue and expenditures for 1906-7, and the disposition of the surplus for 1905-6 are as follows:—

1905-1906.

REVENUE	£143,978,000

BIRTHS, MARRIAGES AND DEATHS IN ONTARIO IN 1904.

During the year 1904 there were registered 50,265 births (including still births), being male and female infants which represents a birth rate of 22.8 per 1,000 of the population, which is an increase of 0.7 per thousand over the preceding year and 1.1 per thousand over the registration of the year 1902. Although the birth rate is not as high as that of the Province of Quebec, yet must be considered satisfactory owing to the fact that a constant drain is taking place of young men of marriageable age to the western provinces of the Dominion, where ultimately they settle down and marry, thus materially reducing the numbers of that class of the population upon which an increase is dependent.

During the year 1904 there were registered 19,789 marriages, being 41 less than were recorded in the preceding year and equal to a rate of 8.9 per thousand of the estimated population, a rate which corresponds very closely to that of 1903 in which there had been a marked increase in marriages over the immediate preceding years.

The figures show that the rate of 1903 has been maintained. Of the total number of marriages, viz., 19,789,

there were registered in the cities 6,618 or 33.4 per cent. 2,545 or 12.8 per cent. in the towns and the remainder 53.6 per cent. in the rural districts.

The total number of deaths registered from all causes for the province was 31,290, divided as follows among the groups of municipalities:

Cities 8,742
Towns over 3,000 populations..... 3,364
Townships, including smaller incorpor-
ated towns and villages..... 19,184

The death rate for the province being 14.1 per thousand of the population, an increase of 0.7 per thousand over the rate for the year 1903.

The counties with a higher mortality rate than the average are, Carleton, Frontenac, Leeds and Grenville, Lincoln, Middlesex, Nipissing, Norfolk, Oxford, Perth, Peterboro', Prescott and Russell, Thunder Bay, Welland, Wentworth and York.

The following Table shows the total deaths in Ontario in the year 1904 arranged according to cause of death, sex, nativity and social conditions:

THE LAW OF INTESTATE ESTATES.

As to all persons who died before the first day of January, 1882, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then where the net value of the real and personal estate does not exceed \$1,000, same belongs absolutely to the widow, and as to any excess over and above said amount after payments of debts, etc., the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

PATENTS IN CANADA.

The Patent Office is a Branch of the Department of Agriculture, and the Minister of Agriculture for the time being is the Commissioner of Patents.

Any person who has invented any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement in any art, machine, manufacture or composition of matter, which was not known or used by any other person before his invention thereof, and which has not been in public use or sale with the consent or allowance of the inventor thereof for more than one year previously to his application for patent therefor in Canada, may, on a petition to that effect, presented to the Commissioner, and on compliance with the other requirements of the Act, obtain a patent granting to such person an exclusive property in such invention.

No patent shall issue for an invention which has an illicit object in view, or for any mere scientific principle or abstract theorem.

Any person who has invented any improvement on any patented invention, may obtain a patent for such improvement; but he shall not thereby obtain the right of vending or using the original invention, nor shall the patent for the original invention confer the right of vending or using the patented improvement.

The Patentee or his legal representatives must, within two years from the date of the patent or an authorized extension thereof, commence and continuously carry on in Canada the construction or manufacture of the invention patented in such manner that any person desiring to use it may obtain it, or cause it to be made for him at a reasonable price at some manufactory or establishment for making or constructing it in Canada. If after twelve months from the granting of the patent, or an authorized extension thereof, the Patentee or his legal representatives imports, or caused to be imported, into Canada the invention for which the patent is granted, such patent shall be void as to the interest of the person so importing.

The Commissioner, upon satisfactory cause being shown, may grant to the Patentee or his legal representatives an extension for a further term not exceeding one year beyond the twelve months during which he may import into Canada the invention; such application must be made within three months before the expiry of the said twelve months.

An Inventor obtaining a patent for his invention in a foreign country before obtaining a Canadian patent, may obtain the latter if same be applied for within one year from the date of the issue of the first foreign patent; and if within three months after the date of issue of a foreign patent the Inventor gives notice to the Commissioner of his intention to apply for a Canadian Patent for such invention, then no other person having commenced to manufacture the same device in Canada during such period of one year shall be entitled to continue the manufacture of the same after the Canadian patent has been obtained without the consent or allowance of the inventor.

Upon application for a patent, or within six months after issue of the patent, the Commissioner may order that, instead of the above provisions as to manufacture

in Canada within two years, such patent shall be subject to the following conditions:—Any person, while the patent continues in force, may apply to the Commissioner for a license to make, construct, use and sell the patented invention, and if the Commissioner is satisfied that the reasonable requirements of the public have not been satisfied by reason of the neglect or refusal of the Patentee or his legal representatives to make, construct, use or sell the invention, or to grant licenses for so doing to others on reasonable terms, he may make an order under his hand and the seal of the Patent Office requiring the owner of the patent to grant a license to the person applying therefor upon such terms as to royalties, etc., as the Commissioner deems just, and if the Commissioner makes such an order, and the owner of the Patent refuses or neglects to comply therewith within three Calendar months after a copy of it is addressed to him or to his duly authorized agent, the patent and all rights and privileges thereby granted shall cease and determine.

An application for a patent is made by a petition wherein the title or name of the invention is set forth, and in which the applicant declares that he is the inventor of the invention, as well as placing his domicile at some known and specified place in Canada, and such petition must be verified by affidavit or affirmation of the applicant that he believes he is the inventor of the said invention, and that the statements in the petition are true. Should the inventor be dead, such oath or affirmation may be made by his assignee or legal representative, and with the petition must be filed a specification (in duplicate) of the invention which shall correctly and fully describe the mode of operating same, the contrivances and things claimed as new, and for the use of which exclusive property and privilege is claimed, and shall bear the name of the place where, and date when, made, and shall be signed by the applicant and by two witnesses. In the case of a machine, the specification shall fully explain the principle and several modes in which it is intended to apply, and work out the same; and where the invention admits of illustration by means of drawings, the applicant shall also send in drawings in duplicate, showing clearly all parts of the invention. In all cases in which the invention admits of representation by model, the applicant, if required by the Commissioner, shall also furnish a model of convenient size; and when the invention is a composition of matter, the applicant shall also, on like request, furnish specimens of the ingredients and composition sufficient in quantity for the purpose of experiment.

In the case of conflicting applications for any patent, provision is made for submitting same to the arbitration of three skilled persons, two of whom shall be chosen by the applicants and the third by the Commissioner, and the decision or award in writing of such arbitrators, or of any two of them, shall be final.

A patent is granted for a term of eighteen years, but at the time of the application it is optional for the applicant to pay the fee for the term of six years, or twelve years only, as desired, and, unless further renewal payments are made, the patent expires on such dates respectively.

* The patent may be assigned, but unless same duly registered in the Patent Office shall be null and void as against any subsequent assignee.

Every person who, without the consent in writing of the Patentee, makes, constructs, or puts into practice any invention for which a patent has been obtained, or who procures such invention from any person not authorized by the patentee, and who uses it, shall be liable to the patentee, or his legal representative, in damages.

Any action for infringement of the patent may be brought in any Court of record having jurisdiction to the amount of the damages claimed in the Province in which the infringement is alleged to have taken place. Proceedings may also be taken in the Exchequer Court, which has jurisdiction over the entire Dominion of Canada.

Every patentee shall stamp or engrave on each patented article sold or offered for sale by him the year of the date of the patent of such article, thus:—"Patented 1898," or as the case may be; or when, from the nature of the article, this cannot be done, then by affixing to it, or to every package where one or more of such articles is or are enclosed, a label marked with a like notice. For violation of this provision there is imposed a penalty not exceeding \$100.00, and, in default of payment thereof, imprisonment for a term not exceeding two months.

Falsely marking an article as patented with the intent of counterfeiting or imitating the stamp, mark, or device of the patent of another person, or of deceiving the public, or offering for sale as patented any article not patented in Canada, is a misdemeanour, and for which there is a fine not exceeding \$200.00, or imprisonment for a term not exceeding three months, or both.

Any intending applicant for a patent who has not yet perfected his invention, and is in fear of being despoiled of his idea, may file in the Patent Office a description of his invention so far, with or without plans, of his own will, and the Commissioner, on payment of the pre-

scribed fee, shall cause the said document, which shall be called a caveat, to be preserved in secrecy, and, if application is made by any other person for a patent interfering in any way therewith, the Commissioner shall forthwith give notice, by mail, of such application to the person filing such caveat, who shall, within three months thereafter, if he wishes to avail himself of the caveat, file his petition, and take the other steps necessary on an application for a patent. The application for the patent must be made within one year from filing of caveat, otherwise the Commissioner is relieved from the obligation of giving notice.

The Government of Canada may, at any time, use any patented invention by paying to the Patentee such sum as the Commissioner reports to be a reasonable compensation for the use thereof.

All specifications, drawings, models, disclaimers, judgments, and other papers, except caveats, shall be open to the inspection of the public at the Patent Office, under such regulations as are adopted in that behalf.

The following fees are payable:—Full fee on patent for 18 years, \$60.00; partial fee for 12 years, \$40.00; partial fee for 6 years, \$20.00; on filing caveat, \$5.00; on registering assignment patent, \$2.00; for copy of patent, with specification, \$4.00.

The disbursements for filing an application in Great Britain are \$25.00; France, \$20.00; Germany, \$5.00, and \$7.50 before issuing patent; Australia, \$20; Russia, \$75.00; British India, \$20.00. The German and French patents cover not only Germany and France but also their colonies. The Russian patent extends to all of the Russian possessions.

The disbursements for filing an application in the Australian States, namely, Queensland, Victoria, New South Wales, South Australia, Western Australia and Tasmania are \$5.00 on filing of the application, \$10.00 on allowance of same and \$25.00 for preparation of the sealing of patent; New Zealand, \$20.00; Mexico, \$75.00; Natal, \$50.00; Japan, \$75.00; Jamaica, \$150.00.

THE LAKE ST. JOHN TERRITORY.

This territory, extending northwards to the boundary of the Province of Quebec, and westward to the River St. Maurice, embraces the valley of the Batiscan and the field of lumbering operations on the Saguenay and St. Maurice, estimated at 60,000,000 feet, B.M., per annum, or one-fourth of Quebec's entire export of sawn lumber. Of this area of 44,000 square miles or 28,000,000 acres, comparatively little is known outside of the valley of Lake St. John, where colonization is making rapid progress, and there is a population of 49,765 souls.

The Soil, says a visitor, "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointeaux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain was as fine as any to be found in this district.

"The climate of the Lake St. John region is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less." Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

	1871.	1881.	1891.	1901.		1871.	1881.	1891.	1901.
Grains	324,558	521,013	744,938	1,532,075	Butter, pounds..	148,106	393,127	430,812	444,012
Potatoes, bushels	156,996	287,238	306,570	457,845	Head of live stock	44,772	59,795	117,602	114,100
Hay, tons	5,966	16,347	32,711	48,273	Population	17,493	32,409	38,281	49,765

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate. Let us then compare its production at Lake St. John with the best districts of the Province, viz: the Eastern Townships, and we find that the census returns show in 1881:—

	Population.	Bush. Wheat.	Bush. per 1000 of pop.
Chicoutimi.....	32,400	154,589	4,800
Compton.....	19,561	34,181	1,800
Stanstead	15,556	37,727	2,400
Huntingdon.....	15,495	24,378	1,600

Last year the railway transported 3,041,011 pounds of cheese. The value of cheese and butter manufactured in the district last year is estimated at \$700,000.

The official reports of the Meteorological Department at Toronto show the average temperature of Roberval to be 35.9 for the year, 12.2 for the winter and 59.7 in summer—as compared with 31.8, 1.4, and 57.1 respectively at Chicoutimi; 37.0, 8.7, and 60.3 at Quebec; 39.2, 10.4, and 62.5 at Montreal, and 31.2, 3.4, and 57.6 at Moose Factory. The average winter snow-fall is 43.5 inches at Roberval, 36.1 at Chicoutimi, 94 at Quebec, 94.1 at Montreal, and 33.6 at Moose Factory.

Careful surveys of the country intervening between Lake St. John and James Bay prove that the engineering difficulties to be surmounted in extending the railway from its present northern terminus at Roberval to the southern extremity of James Bay, which it is intended to do, are very much less than those encountered in building the Quebec and Lake St. John Railway. This link of railway between Lake St. John and James Bay will be an important section of the projected Trans-Canada road. The James Bay section of this road will not only bring to Lake St. John, Chicoutimi, and Quebec the products of the fisheries and mines of the James and Hudson Bay regions, but by its extension through the rich townships to the north-west of Roberval will give additional means of communication and add value to the fertile lands of Ashuapmouchouan, Demeules and Dufferin townships and the villages of St. Prime and St. Félixien, as well as all the neighboring townships.

CHART

of the relative positions in latitude of the Nations of Europe and their Capitals with the Provinces of Canada and their chief Cities, also comparative sizes from East to West.

NOTE.—The East and West sizes start from the Northern latitudes in Europe, and the Southern in Canada.

The Triangles give an approximate idea of the sizes and positions of the various Nations and Provinces, also population (mostly 1901.)

Entered according to Act of Parliament, in the year one thousand nine hundred and six, by James R. Roaf, in the Office of the Minister of Agriculture.

The above interesting chart, compiled by Mr. James R. Roaf, of Toronto, shows the comparative latitude of the chief Cities of Canada as compared with the Cities of Europe.

It will be seen that Toronto, Halifax, Ottawa, Montreal, Fredericton, Charlottetown and Quebec, all lie South of Berne, Switzerland. That Winnipeg is slightly North of Paris, France, and South of London, and that Edmonton is on nearly the same latitude as Dublin, Ireland.

SOME FACTS ABOUT CANADA.

The earliest official records show that John and Sebastian Cabot, sailing under commission from King Henry VII of England, landed in 1497 on that part of the present Dominion of Canada known as Cape Breton in Nova Scotia.

Gaspar Cortereal discovered and named the Labrador coast in 1500.

Jacques Cartier, of St. Malo, France, acting under the authority and patronage of Francis I of France, discovered, in 1534, those portions of the Dominion of Canada now called New Brunswick, Prince Edward Island, and Quebec, and on his return to France presented the King with the first official record there is of the existence of these regions.

Captain Cook in 1778 gave the first authentic record of the discovery of Vancouver Island and the Pacific Ocean coast of the present Dominion.

Frobisher, Hudson, Parry, Franklin, Richardson, Back, Mackenzie, Simpson, Vancouver and others, between 1576 and 1847 explored and named the north and north-west coasts of the Dominion.

Colonization was practically begun in 1605-8. In 1605 Baron de Poutrincourt established Port Royal (now Annapolis Royal, in Nova Scotia), the first actual settlement by Europeans. In 1608 Champlain founded Quebec.

HEAD OFFICE. 7 & 9 ADELAIDE ST. EAST, TORONTO

THE SUCCESSION DUTY ACT.

R.S.O. (1897), CHAP. 24 AND AMENDMENTS THERETO.

This Act applies to the Estates of all persons dying after 1st July, 1892.

The word "property" includes real and personal property of every description and every estate or interest therein capable of being devised or bequeathed by will or of passing on the death of the owner to his heirs or personal representatives.

The word "child" shall be deemed to include any lawful child of the deceased or any lineal descendant of such child or any person or persons adopted before the age of twelve years by the deceased as his child or children or any infant to whom the deceased for not less than ten years immediately prior to his death stood in the acknowledged relationship of a parent or any lineal descendant of such adopted child as aforesaid born in lawful wedlock.

The phrase "aggregate value" means the value of the property after the debts, encumbrances or other allowances (set out in the act) are deducted therefrom and shall include property situate outside of the Province as well as within.

"Dutiable value" means the value of the property after the debts, encumbrances or other allowances are deducted therefrom.

In determining the dutiable value of any property the value shall be taken as at the date of the death of the deceased, and allowance shall be made for reasonable funeral expenses and for his debts and encumbrances, but an allowance shall not be made (a) for debts incurred by the deceased or encumbrances created by a disposition made by the deceased unless such debts or encumbrances were incurred or created *bona fide* for full consideration in money or money's worth wholly for the deceased's own use and benefit and take effect out of his interest. (b) For any debt in respect whereof there is a right to reimbursement from any other estate or person. (c) More than once for the same debt or encumbrance charged upon different portions of the estate.

No duty shall be leviable:—

(1) On any estate the aggregate value of which does not exceed \$10,000. (2) On property devised or bequeathed for religious, charitable or educational purposes to be carried on by a corporation or persons domiciled within the Province of Ontario. (3) On property passing under a will intestacy or otherwise to or for the use of a father, mother, husband, wife, child, daughter-in-law or son-in-law of the deceased, where the aggregate value of the property as defined by this Act passing to the persons mentioned does not exceed \$50,000.

Save as aforesaid the following property shall be subject to a succession duty:—

(a) All property situate within this Province and any interest therein or income therefrom, whether the deceased person owning or entitled thereto was domiciled in Ontario at the time of his death or was domiciled elsewhere, and all moveable or personal property locally situate out of this Province and any interest therein where the owner was domiciled in this Province at the time of his death, whether such property passes by will or intestacy.

(b) All property situate as aforesaid or any interest therein or income therefrom, which shall be voluntarily transferred by deed, grant, bargain, sale or gift made in contemplation of the death of the grantor, bargainor, vendor or donor, or made or intended to take effect in possession or enjoyment after such death to any person in trust or otherwise or by reason whereof any person shall become beneficially entitled in possession or expectancy to any property or the income thereof.

(c) Any property taken as a *donatio mortis causa* made by any person dying, on or after the 7th April, 1896, or taken under a disposition made by any person so dying purporting to operate as an immediate gift, during life, whether by transfer, delivery, declaration of trust, or otherwise which shall not have been *bona fide* made twelve months before death of deceased.

(d) Any property which a person dying on or after the 7th day of April, 1896, having been absolutely entitled thereto has caused or may cause to be transferred to or vested in himself, and any other person jointly whether by disposition or otherwise so that the beneficial interest therein or in some part thereof passes or accrues by survivorship on his death to such other person, including also any purchase or investment effected by the person who was absolutely entitled to the property either by himself alone or in concert or by arrangement with any other person.

(e) Any property passing under any past or future settlement including any trust whether in writing or otherwise, and whether for valuable consideration or not made by any person dying on or after 7th April, 1896, by deed or other instrument not taking effect as a will whereby any interest in such property or the proceeds thereof for life or any other period is reserved to the settlor, or whereby the settlor may have reserved the right to exercise any power to restore to himself the absolute interest in such property.

(f) Any annuity or other interest purchased or provided by any person dying on or after 7th April, 1896, either by himself alone or in concert with any other person to the extent of the beneficial interest arising by survivorship or otherwise on the death of the deceased.

(g) Any interest in dower or by the courtesy in any land of the person so dying to which the wife or husband of the deceased becomes entitled on the decease of such person.

Where the aggregate value of the deceased's property exceeds \$50,000, and passes in manner aforesaid either in whole or in part to or for the benefit of the father, mother, husband, wife, child, son-in-law or daughter-in-law of the deceased, the same or so much thereof as so passes (as the case may be) shall be subject to a duty at the rate and on the scale as follows:—

(a) Where the said aggregate value exceeds \$50,000 and does not exceed \$75,000, 1 per cent.

(b) Exceeds \$75,000 and does not exceed \$100,000, 2 per cent.

(c) Exceeds \$100,000 and does not exceed \$150,000, 3 per cent.

(d) Exceeds \$150,000 and does not exceed \$200,000, 4 per cent.

(e) Exceeds \$200,000, 5 per cent.

Provided where the value of any dutiable property exceeds \$100,000 and the amount passing in manner aforesaid to any one person exceeds the amount hereinafter mentioned, a further duty shall be paid on the amount so passing in addition to the rates in the foregoing paragraph mentioned as follows:—

(a) Where the whole amount so passing to one person exceeds \$100,000 and does not exceed \$200,000, 1 per cent.

(b) Exceeds \$200,000 and does not exceed \$400,000, 1½ per cent.

(c) Exceeds \$400,000 and does not exceed \$600,000, 2 per cent.

(d) Exceeds \$600,000 and does not exceed \$800,000, 2½ per cent.

(e) Exceeds \$800,000, 3 per cent.

Where the aggregate value of the property of the deceased exceeds \$10,000, so much thereof as passes to or for the benefit of the grandfather or grandmother or any other lineal ancestor of the deceased, except the father and mother, or to any brother or sister of the deceased, or to any descendant of such brother or sister, or to a brother or sister of the father or mother of the deceased, or to any descendant of such last mentioned brother or sister shall be subject to a duty of \$5 for every \$100 of the value.

Provided that where the value of any dutiable property exceeds \$50,000, and the amount passing in manner aforesaid to any one person mentioned in the next preceding subsection, except the father and mother, exceeds the amount hereinafter mentioned, a further duty shall be paid on the amount so passing in addition to the duty in the next preceding subsection mentioned as follows:—

(a) Where the whole amount so passing to one person exceeds \$50,000 and does not exceed \$100,000, 1 per cent.

(b) Exceeds \$100,000 and does not exceed \$150,000, 1½ per cent.

(c) Exceeds \$150,000 and does not exceed \$200,000, 2 per cent.

(d) Exceeds \$200,000 and does not exceed \$250,000, 2½ per cent.

(e) Exceeds \$250,000 and does not exceed \$300,000, 3 per cent.

(f) Exceeds \$300,000 and does not exceed \$350,000, 3½ per cent.

(g) Exceeds \$350,000 and does not exceed \$400,000, 4 per cent.

(h) Exceeds \$400,000 and does not exceed \$450,000, 4½ per cent.

(i) Exceeds \$450,000, 5 per cent.

Where the aggregate value of the property of the deceased exceeds \$10,000, and any part thereof passes to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described, or to or for the benefit of any stranger in blood to the deceased, save as hereinbefore provided for the same, shall be subject to a duty of \$10 for every \$100 of the value.

Any portion of an estate where the deceased at time of death is domiciled in Ontario, and which is brought into Ontario by executors or administrators to administer shall be liable to duty, but if any succession duty or tax has been paid thereon elsewhere than in Ontario, and such duty or tax so collected is greater than the duty payable in this Province no duty shall be payable thereon; but if the duty so paid elsewhere is less than the Ontario duty then the difference must be paid.

Where any duty or tax shall have been paid by the estate upon any moveable or personal property locally situate outside of Ontario or any interest therein, an allowance shall be made for any outside duty paid thereon; the difference, if any, between the outside and Ontario duty shall be likewise paid. Provided the above allowances and differences are only made with

respect to any country, state or British Province or possession where a similar allowance is made for the duty or tax paid under this Act on property in Ontario passing on the death of any person domiciled in any such outside country.

Should an executor or administrator, in order to escape payment of Succession Duty, distribute any part of said estate without bringing the same into Ontario, such executor or administrator shall be liable, personally, to pay His Majesty the amount of duty as if such assets had been brought within Ontario, provided that this shall not apply to payments made to persons domiciled out of Ontario from assets situate without the Province.

No foreign executor or administrator shall assign or transfer any stocks or shares in Ontario standing in the name of a deceased person, or in trust for him, which are liable to pay Succession Duty until such duty is paid or security given therefore as provided, and any corporation allowing a transfer of any stocks or shares contrary to this provision shall be liable to pay the duty.

An executor or administrator applying for letters probate or administration to the estate of a deceased person shall, before the issue of such letters to him, make and file with the Surrogate Registrar a full and correct statement under oath, giving (a) full itemized inventory of all the property of the deceased and the market value thereof. (b) The several persons to whom the same will pass under the will or intestacy and the degree of relationship in which they stand to the deceased; and such executor or administrator shall, before the issue of such letters probate, deliver to the Surrogate Registrar a bond, in a penal sum equal to ten per cent. of the sworn value of such property liable to Succession Duty, executed by himself and two sureties to be approved of by the Registrar conditioned for the due payment of any duty to which the property may be found liable.

Should the Treasurer of Ontario be not satisfied with the value so sworn to or with the correctness of the Inventory, he shall direct the Sheriff of the County or City to make a valuation and appraise the said property, and provision is made for an appeal from such appraisal to the Surrogate Judge of the County within thirty days after making and filing such assessment. The duties imposed by the Act unless otherwise provided for shall be due and payable at the death of the deceased or within eighteen months thereafter. Should they not then be paid interest at 5 per cent. per annum from death of deceased shall be charged and collected, and same shall be a lien upon the property in respect to which they are payable until fully paid. Provision is made however as regards postponement of the duty payable on any future or contingent estates, income or interest, with the consent of the Provincial Treasurer in writing, until such estate, income or interest comes into possession. The Treasurer of the Province, on being satisfied that the full amount of Succession Duty has been or will be paid in respect of an estate or in part thereof shall, if required, give to the person accounting for the duty a certificate which shall discharge from any further claim the property shown by the certificate to form the estate.

An administrator, executor or trustee having in charge or trust any estate, legacy or property subject to duty shall deduct same therefrom or collect the duty thereon from the person entitled to such property, and shall not deliver any property subject to duty to any person until he has collected the duty thereon.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to His Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November, due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

Chief Justice of Ontario—Hon. Charles Moss (\$8,000).
Justices of Appeal—Hon. F. Osler, Hon. J. T. Garrow.
 Hon. J. J. MacLaren, Hon. R. M. Meredith (\$7,000 each),
Registrar—J. A. McAndrew. *Assistant Registrar*—Charles S. Grant. *Usher and Messenger*—E. Oliver.

High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the King's Revenue (including the condemnation of contraband or smuggled goods) as may be done by His Majesty's Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators,

co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

LAW CIRCUITS.—*Sittings for Hearing of Actions.*—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the Judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of His Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

WEEKLY SITTINGS.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Tuesdays and Fridays. Court business on Mondays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

CHAMBERS.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

LONG VACATION extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the day next preceding the Christmas Vacation, and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

Synopsis of Fishery Laws.

Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of fire-arms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes.

The above enactments and close seasons are supplemented in special cases, under authority of the *Dominion Fisheries Act* (Chap. 95 R. S.), by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed: Department of Marine and Fisheries, Ottawa.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees may be appointed by the City Councils, or may be elected by general vote of qualified electors. Separate School Boards of Trustees have also the right to appoint trustees. The Principal of the High School or Collegiate Institute must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Fees are charged in many cases, and local rates must be raised. Every High School should have a Principal and at least two assistant teachers. Each school receives a fixed amount of \$375, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have complied with certain conditions as to equipment, special teachers, etc., may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation to the Universities. There were 42 Collegiate Institutes and 98 High Schools in Ontario in 1905.

Public Schools.—Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality.

Educational Museum.—Connected with the Education Department is a Museum, containing specimens of school apparatus, etc., a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archaeological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Curator of Museum. The Museum is open to the public from 9 a.m. to 5 p.m.

DUMPING CLAUSE

5. That in the case of articles exported to Canada of a class or kind made in Canada, if the export or actual selling price to an importer in Canada be less than the fair market value of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to Canada at the time of its exportation to Canada there shall, in addition to the duties otherwise established, be levied, collected and paid on such article, on its importation into Canada, a special duty (or dumping duty) equal to the difference between the said selling price of the article for export and the said fair market value thereof for home consumption;

Provided that the said special duty shall not exceed fifteen per cent. ad valorem in any case;

Provided also that the following goods shall be exempt from such special duty, viz.:

- (a) Goods whereon the duties otherwise established are equal to fifty per cent. ad valorem;
- (b) Goods of a class subject to excise duty in Canada;
- (c) Sugar refined in the United Kingdom.

Provided further that excise duties shall be disregarded in estimating the market value of goods for the purposes of special duty when the goods are entitled to entry under the British Preferential Tariff.

- (2) That the expression "export price" or "selling price" in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to Canada.

- (3) That if at any time it appears to the satisfaction of the Governor-in-Council, on a report from the Minister of Customs, that the payment of the special duty by this section provided for is being evaded by the shipment of goods on consignment without sale prior to such shipment, the Governor-in-Council may in any case or class of cases authorize such action as is deemed necessary to collect on such goods or any of them the same special duty as if the goods had been sold to an importer in Canada prior to their shipment to Canada.

(4) That if the full amount of any special duty of customs is not paid on goods imported, the customs entry thereof shall be amended and the deficiency paid upon the demand of the Collector of Customs.

(5) That the Minister of Customs may make such regulations as are deemed necessary for carrying out the provisions of this section and for the enforcement thereof.

(7) That such regulations may also provide for the exemption from special duty of any article when the difference between the fair market value and the selling price thereof to the importer as aforesaid amounts only to a small percentage of its fair market value.

SURTAX

6. That articles which are the produce or manufacture of any foreign country which treats imports from Canada less favourably than those from other countries may be subject to a Surtax over and above the duties specified in the said Schedule "A," such Surtax in every case to be one-third of the duty specified in the General Tariff in the said Schedule "A."

(1) That any question arising as to any foreign country or goods coming under the operations of the provisions in regard to the Surtax shall be decided by the Minister of Customs, whose decision shall be final;

DRAWBACK

9. That on the materials set forth in Schedule "B" to these Resolutions, there may be paid out of the Consolidated Revenue Fund, the several rates of drawback of Customs duties set opposite to each item respectively in such Schedule, when

COMBINE CLAUSE

11. That whenever from or as a result of proceedings in any Court of Justice, it appears to the satisfaction of the Governor-in-Council, that with regard to any article of commerce there exists any conspiracy, combination, agreement or arrangement of any kind among manufacturers of such articles or dealers therein to unduly promote the advantage of the manufacturers or dealers at the expense of the consumers, the Governor-in-Council may admit the article free of duty, or so reduce the duty thereon as to give to the public the benefit of reasonable competition in the article, if it appears to the Governor-in-Council that such disadvantage to the consumer is facilitated by the duties of Customs imposed on a like article.

(2) That whenever the Governor-in-Council deems it to be in the public interest to enquire into any conspiracy, combination, agreement or arrangement alleged to exist among manufacturers or dealers in any article of commerce to unduly promote the advantage of the manufacturers or dealers in such article at the expense of the consumers, the Governor-in-Council may commission or empower any judge of the Supreme Court, or Exchequer Court of Canada, or of any Superior Court in any Province of Canada, to enquire in a summary way into and report to the Governor-in-Council whether such conspiracy, combination, agreement or arrangement exists.

(3) That the judge may compel the attendance of witnesses and examine them under oath and require the production of books and papers, and shall have such other necessary powers as are conferred upon him by the Governor-in-Council for the purpose of such enquiry.

(4) That if the judge reports that such conspiracy, combination, agreement or arrangement exists in respect of such article, the Governor-in-Council may admit the article free of duty, or so reduce the duty thereon as to give to the public the benefit of reasonable competition in the article, if it appears to the Governor-in-Council that such disadvantage to the consumer is facilitated by the duties of Customs imposed on a like article.

"Millions of Dollars of Eastern Money are invested on mortgage security in the West for the simple reason that it has been found profitable."

ALL THE INVESTMENTS OF THE GREAT-WEST LIFE ASSURANCE COMPANY ARE IN WESTERN SECURITIES

The belief of the founders of The Great-West Life Assurance Company, that a Western Company, with all its interests in the prosperous West, could issue policies on unusually advantageous terms, has been abundantly justified.

Founded in Winnipeg in 1892, the Company has prospered steadily, and now operates from Coast to Coast.

In October, 1906, the business in force exceeds \$27,000,000 ; the annual income is over \$1,100,000, and the average rate of interest earned on investments is over 7%.

Low Premiums, High Profits to Policyholders, and the Safeguard of Thoroughly Conservative Management, are the Essential Elements of GREAT-WEST LIFE Insurance.

The Law Society of Ontario.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and

of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

LIFE ASSURANCE.

Life assurance in Canada may be said to be entirely conducted by companies incorporated by the Dominion Parliament. Their operations are governed by the provisions of their Charter and those of the General Insurance Act of Canada.

During 1905, 40 active companies were engaged in business, of which 22 were Canadian, 6 British, and 12 United States. The new assurances effected for the year amounted to \$105,907,336, an increase of \$7,601,234 over those of 1904. The amount effected in each of the three classes of companies was as follows:

Canadian Companies, \$67,539,141, or 64% of the whole.
British " 3,881,980, " 4% " "
United States " 34,486,215, " 32% " "

The aggregate assurance in force in Canada at the close of 1905 was \$630,334,240, or \$42,453,450 in excess of that existing at the close of 1904. The total was distributed thus:

Canadian Companies, \$397,946,902, or 63% of the whole.
British " 43,809,211, " 7% " "
United States " 188,578,127, " 30% " "

That life assurance has developed and increased with the progress of the country, is abundantly evidenced by reviewing the figures contained in the following table, which sets forth the total assurance in force at the four periods, 1875, 1885, 1895 and 1905.

FOREIGN BUSINESS.

During recent years some of the Canadian Companies have extended their field of operation to places outside of Canada. This remark especially applies to the Canada Life, Confederation Life, Manufacturers Life, North American Life, and Sun Life.

SYSTEMS OF ASSURANCE.

On the following page will be found the premium rates of the principal companies for quinquennial ages, upon the ordinary systems of assurance, viz.: Whole Life; Whole Life with premiums limited to 10, 15, and 20 years; Endowment Assurance payable at the end of 10, 15 and 20 years, or at prior death with annual premiums limited to those periods. It will be observed that the premiums of the different companies vary very slightly. This is only to be expected in view of the fact that the same mortality table (the Institute of Actuaries Healthy Male Table) and the same rate of interest (3½%) are employed by practically all of the Canadian Companies.

BASIS OF RESERVE.

The Dominion Insurance Act stipulates that the valuation of policies of assurance issued prior to January 1st, 1900, shall be made on the Institute of Actuaries (Hm.) Table of Mortality, and a rate of interest not exceeding 4½%, and of policies issued after that date on the same Table of Mortality and 3½% interest. It further stipulates, in respect to policies issued prior to January 1st, 1900, that the rate of interest shall be modified to 4% in 1910, and 3½% in 1915. Several of the companies have already placed their reserves for all policies upon, the stronger 4% Standard, while some have even gone so far as to anticipate the ultimate 3½% rate.

INVESTMENT POWERS.

Prior to 1899 the investment powers of Canadian Life Assurance Companies were determined by their respective Acts of Incorporation. At the 1899 Session of the Dominion Parliament the General Insurance Act was amended, enlarging and making general the investment powers of the companies. A detailed statement of the investments of these institutions will be found in the Yearly Report of the Superintendent of Insurance for the Dominion.

ANNUAL RETURNS.

The General Insurance Act requires each Company to make to Government a sworn return, embracing great detail, each year not later than the 1st day of March. These returns include statements of receipts, expenditures, assets, liabilities, policies issued and policies terminated. They are subsequently published in the report of the Superintendent of Insurance.

The Voyage of the "Discovery"

BY

CAPTAIN ROBERT F. SCOTT, C.V.O., R.N.

WITH ILLUSTRATIONS AND MAPS

Two Volumes, Cloth, - - \$2.00

The "Discovery," the first ship ever built in England especially for exploration, sailed in the summer of 1901. In an absence of three years her company spent more than two beyond the Antarctic Circle, and two winter seasons at a point 400 miles beyond any former wintering party.

After an imprisonment of nearly two years in the ice, the "Discovery" was released under circumstances of dramatic interest, and after pursuing further exploration to the westward she returned to New Zealand with the loss of a single man.
